Speech-Language Pathologists (SLPs) can help! SLPs are all master's-level educated individuals working to help children & adults improve communication. SLPs provide a variety of coursework & clinical placements prior to treating clients.

SLPs are licensed both by the state in which they practice & the American Speech-Language-Hearing Association (ASHA) to work with individuals of varying needs & diagnoses in the areas of articulation, expressive and pragmatic language, articulation and phonology, fluency, voice, feeding and swallowing.

SLPs typically work in clinics, schools, hospitals, or nursing homes.

HOW TO ENCOURAGE SPEECH & LANGUAGE

Communicative temptations: create situations where a child needs to gesture, vocalize, or verbalize to have his or her needs met before giving desired object (e.g., bubble blower)

Imitations: having a child imitate you helps him or her to produce words & sounds at appropriate times (e.g., saying "hi" to animal howl as you take them out of the box)

Expanding: using a child's language and expanding it to make it more complex (e.g., child says "ball," adult can say "that is your ball")

Build vocabulary: target and engage relevant new words (e.g., seasonal words) to help build vocabulary

Read aloud: emphasize & reinforce new words, ask questions about the story while reading, ask child to retell the story (if age appropriate)

Ask questions: posing questions about daily activities are a great way to encourage language skills, including naming & understanding functions.

Narrate everything: modeling your own speech and language can increase exposure to correct production & enhance a child's abilities.

The Development and Disorders of Speech in Childhood Muriel E. Morley, 1967 **Differential Diagnosis and Treatment of Children with Speech Disorder** Barbara Dodd, 2013-05-30 Paediatric speech and language therapists are challenged by diminished resources and increasingly complex caseloads. The new edition addresses their concerns. Norms for speech development are given differentiating between the emergence of the ability to produce speech sounds, articulation and typical developmental error patterns, phonology. The incidence of speech disorders is described for one UK service providing crucial information for service management. The efficacy of service provision is evaluated to show that differential diagnosis and treatment is effective for children with disordered speech. Exploration of that data provides implications for prioritising case loads. The relationship between speech and language disorders is examined in the context of clinical decisions about what to target in therapy. New chapters provide detailed intervention programmes for subgroups of speech disorder: delayed development, use of atypical error patterns, inconsistent errors and development verbal dyspraxia. The final section of the book deals with special populations: children with cognitive impairment, hearing and auditory processing difficulties. The needs of clinicians working with bilingual populations are discussed and ways of intervention described. The final chapter examines the relationship between spoken and written disorders of phonology. *Language Disorders from Infancy Through Adolescence* Rhea Paul, 2007-01-01 This text provides students with the information needed to properly assess childhood language disorders and decide appropriate treatments. The book covers language development from birth to adolescence.
