The Development Of Anthropological Ideas The Dorsey Series In Anthropology:

The Development of Anthropological Ideas John Joseph Honigmann, 1976 **Representing Non-Western Music in Nineteenth-century Britain** Bennett Zon, 2007 Explores the influence of anthropological theories travel literature psychology and other intellectual trends on the perception of non Western music and elucidates the roots of today s field of ethnomusicology Monographic Series Library of Congress, 1977 **The Making of Anthropology** Jacob Pandian, Susan Parman, 2004 This book offers an interpretation of anthropology as a discourse that contrasts the western self and the non western other and shows that the organizing principle of this discourse was the Judeo Christian episteme of the Other in Us that the Christian Church Fathers developed to define why the pagan others were endowed with negative ungodly attributes of humanity It is pointed out that the anthropological application of this episteme to represent and explain the colonized non western others resulted in the emergence of eurocentric hierarchical models of humanity and that although these models of humanity were largely replaced by pluralistic models in the late 20 century anthropology has continued to be linked with the episteme of the other in us Dust jacket *Cultural Anthropology* Josephine Z. Kibbee, 1991 **The Mirror of the Medieval** K. Patrick Fazioli, 2017-05-01 Since its invention by Renaissance humanists the myth of the Middle Ages has held a uniquely important place in the Western historical imagination Whether envisioned as an era of lost simplicity or a barbaric nightmare the medieval past has always served as a mirror for modernity This book gives an eye opening account of the ways various political and intellectual projects from nationalism to the discipline of anthropology have appropriated the Middle Ages for their own ends Deploying an interdisciplinary toolkit author K Patrick Fazioli grounds his analysis in contemporary struggles over power and identity in the Eastern Alps while also considering the broader implications for scholarly research and public memory **The Ethnography of Vietnam's Central Highlanders** Oscar Salemink, 2019-10-18 This book looks at ethnographic discourses concerning the indigenous population of Vietnam s Central Highlands during periods of christianization colonization war and socialist transformation and analyses these in their relation to tribal ethnic territorial governmental and gendered discourses Salemink s book is a timely contribution to anthropological knowledge as the ethnic minorities in Vietnam have again been the object of fierce academic debate This is a historically grounded post colonial critique relevant to theories of ethnicity and the history of anthropology and will be of interest to graduate students of anthropology and cultural studies as well as Vietnam studies **Encyclopedia of Political Economy** Phillip O'Hara, 1999-02-04 Content Description Includes bibliographical references and index **Advances in Social Network Analysis** Stanley Wasserman, 1994-08-12 Social network analysis a method for analyzing relationships between social entities has expanded over the last decade as new research has been done in this area How can these new developments be applied effectively in the behavioral and social sciences disciplines In *Advances in Social Network Analysis* a team of leading methodologists in network analysis addresses this issue They explore such topics as ways to specify the network contents to

be studied how to select the method for representing network structures how social network analysis has been used to study interorganizational relations via the resource dependence model how to use a contact matrix for studying the spread of disease in epidemiology and how cohesion and structural equivalence network theories relate to studying social influence It also offers statistical models for social support networks Advances in Social Network Analysis is useful for researchers involved in general research methods and qualitative methods and who are interested in psychology and sociology

Functions and Uses of Disciplinary Histories Loren Graham, Wolf Lepenies, P. Weingart, 2012-12-06 Edward Gibbon's allegation at the beginning of his Essay on the Study of Literature 1764 that the history of empires is that of the miseries of humankind whereas the history of the sciences is that of their splendour and happiness has for a long time been accepted by professional scientists and by historians of science alike For its practitioner the history of a discipline displayed above all the always difficult but finally rewarding approach to a truth which was incorporated in the discipline in its actual form Looking back it was only too easy to distinguish those who erred and heretics in the field from the few forerunners of true science On the one hand the traditional history of science was told as a story of hero and hero worship on the other hand it was paradoxically enough the constant attempt to remind the scientist whom he should better forget It is not surprising at all therefore that the traditional history of science was a field of only minor interest for the practitioner of a distinct scientific discipline or specialty and at the same time a hardly challenging task for the professional historian Nietzsche had already described the historian of science as someone who arrives late after harvest time it is somebody who is only a tolerated guest at the thanksgiving dinner of the scientific community
