RM Cervero

The Development Of The Dutch Welfare State From Workers Insurance To Universal Entitlement:

The Development of the Dutch Welfare State Robert Henry Cox, *The Development of the Dutch Welfare State* Robert Cox, 1993-10-15 The development of the Dutch welfare state in the Netherlands started later than in other Western European countries but once it started it grew at a spectacular rate The development was so rapid that it catapulted the Dutch from being welfare laggards to being welfare leaders Cox charts the course of this growth from the nineteenth century to the present placing the Dutch case within the larger theoretical discussion of welfare states In so doing Cox challenges the widely held assumption that welfare programs always represent the policies of the social democratic left He demonstrates that it was not the left but the more centrist religious parties that built the Dutch welfare state in the 1960s Even more curious is the fact that these same political forces had resisted the expansion of welfare programs throughout the first half of the twentieth century In many ways the Netherlands is a crucial test case for assumptions about the welfare state Its system is one of the largest in the world rivaling Sweden s as one that devotes the greatest share of public spending to social welfare How does it compare to other countries Do present theories of welfare state development fit the Dutch case What can we learn from the experience of a small state Cox makes a signal contribution in clarifying the historical record concerning a little studied country and in advancing theoretical debate *Religion, Class, and the Postwar Development of the Dutch Welfare State* Dennie Oude Nijhuis, 2025-10-01 This book examines how the Netherlands managed to create and maintain one of the world s most generous and inclusive welfare systems despite having been dominated by Christian democratic or conservative rather than socialist dominated governments for most of the post war period It emphasizes that such systems have strong consequences for the distribution of income and risk among different segments of society and argues that they could consequently only emerge in countries where middle class groups were unable to utilize their key electoral and strong labor market position to mobilize against the adverse consequences of redistribution for them By illustrating their key role in the coming about of solidaristic welfare reform in the Netherlands the book also offers a novel view of the roles of Christian democracy and the labor union movement in the development of modern welfare states By highlighting how welfare reform contributed to the employment miracle of the 1990s the book sheds new light on how countries are able to combine high levels of welfare generosity and solidarity with successful macro economic performance *Business Interests and the Development of the Modern Welfare State* Dennie Oude Nijhuis, 2019-07-05 This edited volume provides a synthesis on the question of business attitudes towards and its influence over the development of the modern welfare state It gathers leading scholars in the field to offer both in depth historical country case studies and comparative chapters that discuss contemporary developments Composed of six archive based historical narratives of business role in the development of social insurance programs in Germany Finland the Netherlands Switzerland the United Kingdom and the United States and six comparative case studies this volume also extends the study of business to policy fields that have hitherto received little

attention in the literature such as active labor market policies educational policies employment protection legislation healthcare private pension programs and work family policies It illuminates why business groups have responded so very differently to demands for increased social protection against different labor market risks in different countries and over time This text will be of key interest to students and scholars of comparative welfare political science sociology social policy studies comparative political economy and welfare history Chapter 4 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Social Capitalism Kees van Kersbergen, 2003-09-02 Christian democracy has been the most successful political movement in post war Western Europe yet its crucial impact on the development of the modern European welfare state has been critically neglected In this study Kees van Kersbergen demonstrates the precise nature of the links between Christian democracy and the welfare state Using a variety of sources the author describes the origin and development of the Christian democratic movement and presents comparative accounts of the varying degrees of political entrenchment of national christian democratic parties Drawing upon cross national indicators of welfare state development he identifies and explains the existence of a distinctively Christian democratic as opposed to a liberal or social democratic welfare state regime which he labels social capitalism This book compares the different national contexts under which christian democratic social theory has been turned into political action Kees van Keersbergen shows how the different social policy performances of crucial cases Germany Italy and the Netherlands have been affected not just by prevalent power structures but also by the coalitional strategies and political abilities of christian democratic parties

Ideas and Politics in Social Science Research Daniel Beland, Robert Henry Cox, 2010-12-10 Writing about ideas John Maynard Keynes noted that they are more powerful than is commonly understood Indeed the world is ruled by little else Ideas have returned as a major focus of political inquiry and scholars dissatisfied with rationalist and materialist approaches are now exploring the power of ideas to shape the political landscape This book gathers leading scholars from a variety of subdisciplines in political science and sociology to provide a state of the art work on the theoretical empirical and methodological issues raised by social science research on ideas and politics

A Long Goodbye to Bismarck? Bruno Palier, 2025-10-01 This book provides an extensive and comparative account of all welfare reforms that occurred during the last three decades in Continental European countries It reveals unexpected important structural reforms to be understood as the culmination of a long reform trajectory analyzed in detail with the tools of comparative historical institutionalism With these reforms Bismarckian welfare systems have lost their encompassing capacities have partially turned to employment friendliness and weakened the strongest elements of their male breadwinner bias This volume is the definitive work on the politics of reform in Bismarckian welfare regimes It is essential reading for any scholar interested in welfare reform or indeed in institutional and policy change more generally Kathleen Thelen Massachusetts Institute of Technology The contributors to the volume are all recognized experts

on their field and provide strictly comparable analyses in their chapters making this volume a gold mine for comparative welfare state scholars Palier's volume is certain to be a benchmark study for the foreseeable future John D Stephens University of North Carolina Chapel Hill This volume representing the best available scholarship in comparative socio economic research provides important and highly policy relevant insights A must read Fritz Scharpf Max Planck Institute for the Studies of Societies

The Reformation of Community Charles H. Parker, 1998-11-28 By the time of the Calvinist Reformation the cities of Holland had established a very long tradition of social provision for the poor in the civic community Calvinists however intended to care for their own church members who were by definition within the household of faith through the deaconate a confessional relief agency This book examines the relationship between municipal and ecclesiastical relief agencies in the six chief cities of Holland Dordrecht Haarlem Delft Leiden Amsterdam and Gouda from the public establishment of the Reformed Church in 1572 to the aftermath of the Synod of Dort The author argues that the conflict between charitable organizations reveal competing conceptions of Christian community that came to the fore as a result of

the Dutch Reformation This is the first comparative study of poor relief in Holland which contributes to our understanding of the Reformation throughout Europe
