air power became such a decisive factor in modern warfare The Immortal Beaver Sean Rossiter,2009-07-01 Developed soon after World War II the de Havilland Beaver has become one of the most successful and long lived designs in aviation history The Beaver was conceived as a half ton flying pickup truck capable of setting down on land water and snow Since its conception the Beaver has been adopted worldwide becoming the floatplane of choice for island hopping along the Pacific Northwest flying into the Arctic transporting missionaries and doctors into remote spots in Africa and serving as a support aircraft in Antarctic expeditions The Beaver also became the generals Jeep during the Korean War and the generals favorite transport to fishing spots in peacetime Atmospheric Flight in the Twentieth Century P. Galison,A. Roland,2013-03-07 All technologies differ from one another They are as varied as humanity s interaction with the physical world Even people attempting to do the same thing produce multiple technologies For example John H White discovered more than 1 1000 patents in the 19th century for locomotive smokestacks Yet all technologies are processes by which humans seek to control their physical environment and bend nature to their purposes All technologies are alike The tension between likeness and difference runs through this collection of papers All focus on atmospheric flight a twentieth century phenomenon But they approach the topic from different disciplinary perspectives They ask disparate questions And they work from distinct agendas Collectively they help to explain what is different about aviation how it differs from other technologies and how flight itself has varied from one time and place to another The importance of this topic is manifest Flight is one of the defining technologies of the twentieth century Jay David Bolter argues in Turing s Man that certain technologies in certain ages have had the power not only to transform society but also to shape the way in which people understand their relationship with the physical world A defining technology says Bolter resembles a magnifying glass which collects and focuses seemingly disparate ideas in a culture into one bright sometimes piercing ray 2 Flight has done that for the twentieth century *The Merlin* Gordon A.
