Economics for a Developing World Michael P. Todaro,1977 An introductory text oriented towards the teaching of economics within the context of the major problems of development and underdevelopment in Third World nations

Democracy in the Developing World Jeffrey Haynes,2013-04-23 Until the late 1980s there were very few democratically elected governments in the developing world These areas were characterized by a range of authoritarian regimes from military administrations to one party dictatorships Over the past decade however the situation has altered significantly and an increasing number of developing countries have made the transition to democracy For some this process of building and consolidating democracy has been relatively easy while for others it has proved more complex and harder to sustain In this important new textbook Jeff Haynes seeks to explain why these differences occur Adopting a broadly comparative approach he begins by examining the theories and practice of democratic transition and consolidation in the new democracies of Africa Asia Latin America and the Middle East Haynes argues persuasively that a country s ability to consolidate democracy depends not only on the interaction of structural and agency factors but also on a variety of specific domestic and international concerns which may

help or hinder democratic progress Using a wide range of case studies to illustrate his argument Haynes provides an accessible and comprehensive analysis of the processes and problems of democratic consolidation in developing nations This is an important textbook that will be invaluable to students in a variety of areas from politics and comparative politics to development studies and history An Introduction to Sustainable Development Jennifer A. Elliott, 2006 This text examines the complex challenges presented by the goal of sustainable development at the local and global level Areas covered include the challenges and opportunities for the developing world in the search for sustainable development **Politics in the Developing World** Peter J. Burnell, Vicky Randall, 2008 This textbook deals with the central political themes and issues in the developing world such as globalization inequality and democracy Leading experts in the field provide up to date and systematic coverage The book is accompanied by an Online Resource Centre Student resources Three additional case studies including one on China Web links from the book Flashcard glossary
