Because we believe this work is culturally important, we have made it available as part of our commitment for protecting, preserving, and promoting the world's literature in affordable, high-quality modern editions that are true to the original work. Religion, Supernaturalism, the Paranormal and Pseudoscience Homayun Sidky, 2019-11-30 Religion Supernaturalism the Paranormal and Pseudoscience provides a comprehensive rejoinder to the challenges posed to science, scientific anthropology, evolutionary theory, and rationality by the advocates of supernatural, paranormal, and pseudoscientific perspectives and modes of thought associated with the current rise of irrationalism, anti-intellectualism, and emboldened religious fundamentalism and violence. Drawing upon H. Sidky's scientific anthropological background and ethnographic field research of supernatural and paranormal beliefs and practices in several cultures over three decades, the book answers several important questions: Why do humans have a proclivity for the supernatural and paranormal thinking? Why has humanity remained shackled to sets of ideas inherited from a violent past that have no basis in reality and which bestow an illusory solace, promote bloodshed, endless cruelties, and fervent hatreds, and have come at a high cost? Why have ancient superstitions been held as sacred, inviolate truths while other aspects of the archaic belief systems of which they were a part have long been discarded? Why have not humans outgrown religion and paranormal beliefs? **Supernaturalism in Human Life** Jacob Pandian, 2002 **Evolution Confusion** Stan Birchfield, 2025-09-08 Finally a fresh look at the creation evolution debate. Designed for anyone who wonders about biological origins, *Evolution Confusion: The Logic of Origins* cuts through the jargon with an unconventional exposé of naturalism, the dominant philosophy underlying all of science today. Using logic, math, science, and a healthy dose of common sense, this book scrutinizes naturalism like never before. In so doing, it lays the groundwork for open dialogue around the age-old question: Where did everything come from? This book is a must-read for everyone who wants to think clearly about our origins, purpose, and destiny. *Evolution Confusion* is sure to inspire many to reconsider a debate that has left a wake of confusion for too long. **Burmese Supernaturalism** Melford E. Spiro, 2017-07-12 Though the people of Burma, now called Myanmar, are formally Buddhist, their folk religion, a type of animism or supernaturalism, is so unlike classical Buddhism that it seems contradictory. For years, scholars of religion and anthropology have debated the questions: Do these folk beliefs make up a separate religious system? Or is there a subtle merging of supernaturalism and Buddhism, a kind of syncretism? In either case, how exactly does folk religion fit into the overall religious pattern? Melford Spiro's *Burmese Supernaturalism* has been one of the major works in this debate, both for its position on the two religions question and for its arguments concerning the psychological basis of religion. The book begins with an introduction to the study of supernaturalism. The next section of the work covers various types of supernaturalism, including witches, ghosts, and demons.

Other areas of discussion include supernaturally caused illness and its treatment the shaman the exorcist and the relationship between supernaturalism and Buddhism In the introduction to this expanded edition Spiro further develops the underlying logic of his argument and evaluates the most recent contributions to the field of the anthropology of religion

Burmese Supernaturalism is an intriguing study and will provide insightful reading for anthropologists sociologists theologians as well as those interested in supernaturalism in Burma Myanmar and other cultures **Adaptability, an Exposition of the Law of All Phenomena** ,1856 Periodical Articles on Religion, 1890-1899 Ernest Cushing Richardson,1907 **German Anti-supernaturalism** Philip Harwood,1841 *Christos, the Religion of the Future* William Kingsland,1996-09 1929 This work gives an outline of our present scientific knowledge of Nature in general the extent of the universe and the principles of evolution and involution and shows how impossible it is to accept the old theological ideas which were formulated **Proceedings at the ... Annual Meeting of the Free Religious Association** Free Religious Association (Boston, Mass.),Free Religious Association (Boston, Mass.). Meeting,1878
