Guide for English Studies Michael J. Marcuse, 2023-11-15

Beyond Economic Man Marianne A. Ferber, Julie A.

Nelson, 2009-04-01 This is the first book to examine the central tenets of economics from a feminist point of view. In these original essays, the authors suggest that the discipline of economics could be improved by freeing itself from masculine biases. *Beyond Economic Man* raises questions about the discipline not because economics is too objective but because it is not objective enough. The contributors, nine economists, a sociologist, and a philosopher, discuss the extent to which gender has influenced both the range of subjects economists have studied and the way in which scholars have conducted their studies. They investigate, for example, how masculine concerns underlie economists' concentration on market as opposed to household activities and their emphasis on individual choice to the exclusion of social constraints on choice. This focus on masculine interests, the contributors contend, has biased the definition and boundaries of the discipline, its central assumptions, and its preferred rhetoric and methods. However, the aim of this book is not to reject current economic practices but to broaden them, permitting a fuller understanding of economic phenomena. These essays examine current economic practices in the light of a feminist understanding of gender differences as socially constructed rather than based on essential male and female characteristics. The authors use this concept of gender along with feminist readings of rhetoric and the history of science as well as postmodernist theory and personal experience as economists to analyze the boundaries, assumptions, and methods of neoclassical, socialist, and institutionalist economics. The contributors are Rebecca M. Blank, Paula England, Marianne A. Ferber, Nancy Folbre, Ann L. Jennings, Helen E. Longino, Donald N. McCloskey, Julie A. Nelson, Robert M. Solow, Diana Strassmann, and Rhonda M. Williams.
