Supply Chain Logistics Management Donald J. Bowersox, David J. Closs, M. Bixby Cooper, John C. Bowersox, 2019-01-16 The Fifth Edition of Supply Chain Logistics Management presents logistics in the context of integration within a firm's supply chain strategy and operations. The framework of supply chain management is initially presented by creating a foundation for in-depth study of the five logistics operational components in Part Two. Challenges and strategies related to design and operational integration of logistics within a global supply chain are discussed in Part Three. Part Four focuses on administrative challenges related to cross-organisational collaboration, performance measurement, and concludes with the challenges of managing risk and achieving sustainability. An essential feature is the integration of topical materials and examples into the supply chain logistics value creation process. Text materials are supported by study and challenge questions as well as contemporary cases. Discussion of IT is integrated throughout, and illustrations and examples highlight how firms deal with operational challenges and use logistics performance to gain competitive advantage.

Inventory planning and management, presenting metrics, processes and systems for forecasting demand, planning and inventory control, yielding lower inventory levels and improved customer service. Logistics information systems and Web-based logistics, helping to substitute information for inventory and work content. Transportation and distribution for connecting sourcing locations with customers at the lowest cost by, among other things, leveraging private and third-party transportation systems. Logistics organization development, including the seven disciplines that link enterprises across the supply chain as well as logistics activities within those enterprises. It describes the major steps in developing an effective, workable logistics management program—one that will reduce operating expenses, minimize capital investment and improve overall customer service and satisfaction.
