Bunker Ship Operations

Ahmed Mahmoud Abd El Wahab, 2022-09-02 Merchant shipping remains the largest carrier of freight throughout recorded history due to the economic advantages involved. Optimum management of the global propulsion power may result in large cut down of marine fuel grades which will in turn benefit environment and the economics of the shipping community. Although water transport is still the most efficient mode, small ratio of CO₂ per cargo ton per mile, the aim is for vessels' further energy efficiency optimization, bunker minimization and in turn reduction of CO₂, NO_x, SO_x. An energy efficiency management scheme cannot be sustained unless a meaningful and practical mode of monitoring is applied.

Ship Operations Baris Soyer, Andrew Tettenborn, 2020-12-01 This book covers in one handy volume all the major topics associated with ship operations. Carefully coordinated to ensure breadth, relevance and lack of overlap, the topics covered are addressed by authors who are the very top of their profession, whether in legal practice or academia, and are presented in a manner which is topical and clear. Part I offers a detailed and critical analysis of issues of contemporary importance concerning new liability regimes and developments. Part 2 discusses how parties, in particular ship operators, attempt in contemporary practice to allocate their risks concerning ship operations. Part 3 evaluates the legal position of those involved in more back office operations.
