Surfactant Replacement Therapy In Neonatal And Adult Respiratory Distress Syndrome:

Surfactant Replacement Therapy Burkhard Lachmann, 2012-12-06 I am very happy and honoured to have so many famous contributors from around the world presenting their knowledge and experience in this book including Dr Rufer who as early as 1967 attempted to improve the pressure volume curve of a child dying from RDS using dried surfactant from dogs Drs Enhorn and Robertson who were the first to treat rabbit fetuses with surfactant replacement and impressively demonstrated that surfactant improved lung mechanics and Dr Fujiwara who at the end of the 1970s had already successfully treated the first babies with surfactant replacement and published this work already in 1980 Thus the idea of surfactant replacement therapy is now more or less 20 years old and almost 10 years have passed since the first publication by Dr Fujiwara of his impressive clinical results Up to now September 1988 about 2 200 babies have been treated worldwide with tracheal instillation of surfactant with most promising results The type of surfactant used varies from pure natural extracts from bovine or pig lungs to surfactant extracted from human amniotic fluid to pure phospholipids To date however there is still no surfactant commercially available except in Japan in spite of the fact that it is urgently awaited by neonatologists and intensive care doctors throughout the world This volume is based on the contributions presented at the international congress on Surfactant Replacement Therapy which was held in Rotterdam The Netherlands in November 1987

Oxygen Transport to Tissue XV Peter Vaupel,Rolf Zander,Duane F. Bruley,2012-12-06 Seventeen years after the 2nd International Symposium on Oxygen Transport to Tissue which was held in Mainz in March 1975 the local Organizing Committee and the Board of ISOTT were pleased to host the ISOTT Conference in Mainz on the Rhine again The venue of the 20th meeting was the prestigious fully restored Schloss Waldthausen Waldthausen Castle which provided a special setting for ISOTT 1992 The beautiful front view of the castle became part of the ISOTT 1992 logo The 20th ISOTT Meeting was held in Mainz from August 26th through August 30th 1992 The Conference attracted 200 active participants from 16 countries The theme of this meeting emphasized oxygen transport to tumors but as in earlier meetings essentially all aspects of oxygen transport within the body were covered as demonstrated by the manuscripts comprising this volume of the series Oxygen Transport to Tissue All manuscripts were reviewed Extensive revisions were made in about 25% and modest revision in about another 30% Because we had to compromise between the aim of rapid publication on the one hand and the need for thorough review on the other minor errors in format and some typographical errors were not corrected Except for some revisions all of the original camera ready manuscripts in this volume were prepared by the authors themselves and we greatly appreciate their cooperation
