The Photographs Of Edouard Baldus:

The Photographs of Édouard Baldus Malcolm R. Daniel, Edouard Baldus, Barry Bergdoll, 1994 This book the first to chronicle the life and career of this important artist brings his work once more before the public **The Photographs of Édouard Baldus** Malcolm Daniel, Barry Bergdoll, 1994 This is a study of landscape and architectural photographer Edouard Baldus 1813 1889 a central figure in early French photography His greatest achievements were his two railroad albums in which he addressed the influence of technology Edouard Baldus at the Château de la Faloise James A. Ganz, 2007 douard Baldus 1813 1889 was the most important French architectural photographer of the mid nineteenth century **The Photographs of Edouard Baldus: Landscapes and Monuments of France** , **The Photographs of Edouard Baldus** , 1994 Architecture in Nineteenth-Century Photographs Micheline Nilsen, 2017-07-05 Revealing that nineteenth century photography goes beyond the functional to reflect the aesthetic intellectual and cultural concerns of the time this study proposes that each photographic image of architecture be studied both as a primary visual document and an object of aesthetic inquiry This multi faceted approach drives Architecture in Nineteenth Century Photographs Essays on Reading a Collection Despite three decades of post colonial post structuralist and gender conscious criticism the study of architectural photography continues to privilege technical virtuosity This volume offers a thematic exploration of the material and a socio historical examination that allows consideration of questions that have not been addressed comprehensively before in a single publication Themes include exoticism and armchair tourism the absence of women from architectural photography the role of photographs as commodities vernacular architecture and the picturesque and historic preservation urban renewal and nationalism Micheline Nilsen analyzes photographs from France and England the two countries where photography was invented and from around the world representing a corpus of over 10 000 photographs from the Janos Scholz Collection of Nineteenth Century Photographs of the Snite Museum of Art at the University of Notre Dame **Nineteenth-Century Photographs and Architecture** Micheline Nilsen, 2017-07-05 Eschewing the limiting idea that nineteenth century architecture photography merely reflects functionality the objective of this collection is to reflect the aesthetic intellectual and cultural concerns of the time The essays hold appeal for social and cultural historians as well as those with an interest in the fields of art history urban geography history of travel and tourism Nineteenth century photographers captured what could be seen and what they wanted to be seen Their images informed of exploration progress heritage and destruction Architecture was a staple subject for the first generation of photographers as it patiently tolerated the long exposures of the early processes During its formative decades photography responded to evolutionary cultural forces of market and artistic production Photographs of architecture reflected a specific political or social context modulated through individual points of view For this reason the examination of each photographic image as a primary visual document and an aesthetic object rather than a technical milestone on a chronological trajectory affords a richer multi faceted approach to the extensive and

complex corpus of photographs taken by photographers all over the world This project acknowledges the importance of technique in the early decades of photography but focuses on the thematic content of the material It places the photography of architecture in an international context under the contemporary critical lens sharpened by theoretical and cultural examinations of the topic *Encyclopedia of Nineteenth-Century Photography* John Hannavy, 2013-12-16 The Encyclopedia of Nineteenth Century Photography is the first comprehensive encyclopedia of world photography up to the beginning of the twentieth century It sets out to be the standard definitive reference work on the subject for years to come Its coverage is global an important first in that authorities from all over the world have contributed their expertise and scholarship towards making this a truly comprehensive publication The Encyclopedia presents new and ground breaking research alongside accounts of the major established figures in the nineteenth century arena Coverage includes all the key people processes equipment movements styles debates and groupings which helped photography develop from being a solution in search of a problem when first invented to the essential communication tool creative medium and recorder of everyday life which it had become by the dawn of the twentieth century The sheer breadth of coverage in the 1200 essays makes the Encyclopedia of Nineteenth Century Photography an essential reference source for academics students researchers and libraries worldwide American Photo ,1995-01 *Apartment Stories* Sharon Marcus, 1999 Apartment Stories works from the brilliant premise that urban culture and domestic architecture are indeed related in a number of unpredictable and mutually enlightening ways Marcus s readings of Balzac and Zola novels in the context of the new urban architecture are absolutely superb and she remains subtle and unexpected at every step Bruce Robbins author of Feeling Global
