The Play And Place Of Criticism:

The Play and Place of Criticism Murray Krieger, 2019-12-01 Originally published in 1967 In *The Play and Place of Criticism* Professor Krieger addresses basic questions related to criticism in the title essay that forms the introduction to this collection and that constitutes a considered statement of his contextualist position In agreement with Spitzer Krieger believes that the critic has a valuable part to play in relating the new words of the individual poem to the old words of the language He goes further in identifying the role of the critic as essentially rhapsodic a sharing in and an expression of the poet's fine frenzy which when it succeeds transports the critic beyond words and dooms his analytical efforts to failure Thus while defending the critic's right to exercise the free play of the mind in approaching his subject the author insists that the critic recognize his subordinate place in performing his act of mediation Elsewhere in the volume Krieger uses other terms and metaphors to explore similar problems revolving around the mediate and the immediate in poetry and criticism In calling for a poetry of still movement for example he examines both the opposition and the union of temporal with spatial or plastically formal elements of the dynamically empirical with the statically archetypal Having defined his critical position in these ways Krieger relates it to other schools of criticism and applies its methods to the analysis of works by Shakespeare Pope Arnold Hawthorne and others

The Play and Place of Criticism Murray Krieger, 1967 **Toward a New Historicism** Wesley Morris, 2015-03-08 Assessing major critics from Vernon Parrington to Murray Krieger Wesley Morris points the way to a new historicism He outlines traditional historicist interests in American literary theory and draws from them the foundation for a vital new study of literature As Mr Morris shows however the new historicism moves beyond necessarily using the most recent developments in linguistics anthropology psychoanalysis the psychology of perception and literary response to see the aesthetic relationship between the work and its context Originally published in 1972 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Theory of Criticism Murray Krieger, 2019-12-01 Originally published in 1976 Representing years of critical reflection *The Theory of Criticism* attempts to construct a poetics of presence Within a wide range of critical terminology Murray Krieger has sought to create a new vision In language that is passionate and often dramatic he looks at the multidimensionality of the poetic world through the lens of Western poetics His work clearly addresses itself to post New Critical questions how to preserve the literary object as a thing to be perceived valued and enjoyed and yet to account for its presence in and interaction with our culture as a whole always in danger of being dissolved into man's language making and forming activity in general Our awareness of the poem as object must be modified by our awareness that it is an intentional

object Krieger develops his balanced vision in three parts Part 1 defines the problem and defends the very activity of theorizing both in its own terms and in terms of the critic's function throughout the history of Western criticism By asking at the outset whether criticism is vain or valuable Krieger already confronts the basic tension between system and world and the need to account for both By creating a heuristic system that examines the possibility of form the critic serves also the world of history and thought as a whole Part 2 pursues that history from the classical encounter with mimesis in Greek thought to the Romantic and post Romantic elevation of consciousness as a main criterion of poetic art Defining a humanistic aesthetic as it has been viewed since Aristotle the author shows how during and after the eighteenth century form was opened up under the impact of a Kantian and post Kantian view epitomized finally by Coleridge's imagination and its consequences for recent theorists Part 3 deals with the image of the world struggling against its enclosure within a poetic context It expands our view of metaphor as a reflection of the dual nature of poetic language simultaneously locked into the poem and referring to history and nature outside Our reading of the poem Krieger concludes must be double we must see the poem as a linear and chronological sequence reflecting real life and we must read it as a circular imitative mutually implicative mode

The Ascetic Imperative in Culture and Criticism Geoffrey Galt Harpham, 1992-02-15 In this bold interdisciplinary work Geoffrey Galt Harpham argues that asceticism has played a major role in shaping Western ideas of the body writing ethics and aesthetics He suggests that we consider the ascetic as the cultural element in culture and presents a close analysis of works by Athanasius Augustine Matthias Gr newald Nietzsche Foucault and other thinkers as proof of the extent of asceticism's resources Harpham demonstrates the usefulness of his findings by deriving from asceticism a discourse of resistance a code of interpretation ultimately more generous and humane than those currently available to us

The Places of Early Modern Criticism Gavin Alexander, Emma Gilby, Alexander Marr, 2021-04-29 What is criticism And where is it to be found Thinking about literature and the visual arts is found in many places in treatises apologies and paragoni in prefaces letters and essays in commentaries editions reading notes and commonplace books in images sculptures and built spaces within or on the thresholds of works of poetry and visual art It is situated between different disciplines and methods Critical ideas and methods come into England from other countries and take root in particular locations the court the Inns of Court the theatre the great house the printer's shop the university The practice of criticism is transplanted to the Americas and attempts to articulate the place of poetry in a new world And commonplaces of classical poetics and rhetoric serve both to connect and to measure the space between different critical discourses Tracing the history of the development of early modern thinking about literature and the visual arts requires consideration of various kinds of place material textual geographical and the practices particular to those places it also requires that those different places be brought into dialogue with each other This book brings together scholars working in departments of English modern languages and art history to

look at the many different places of early modern criticism It argues polemically for the necessity of looking afresh at the scope of criticism and at what happens on its margins and for interrogating our own critical practices and disciplinary methods by investigating their history
