The Play Of Forms Nature Culture And Liturgy:

The Play of Forms Hendrikus Laan, 2005 This book analyses the analogical relationships between the created forms of nature the man made forms of culture and the forms used in religious ritual in order to explore the genesis of liturgical form

The Play of Forms Hans van der Laan, 2005-06-01 Unique of its kind this small philosophical book articulates a wide ranging vision of the analogical relationships between the created forms of nature the man made forms of culture and the forms used in religious ritual Setting out from a precise definition of Christian worship the author explores the genesis of ritual form Born out of the need to complement the world of natural forms cultural forms serve the complete human existence that is both physical intellectual and social Freed from any such purpose cultural forms are condensed to their very essence and thus enabled to serve as liturgical signs A final analogy transcends all visible forms ushering the reading into an all encompassing spiritual and mystical realm Previous books by Hans van der Laan ISBN 90 04 07618 2 Het vormenspel der liturgie Dutch ISBN 90 04 10838 6 Architectonische Ruimte Dutch ISBN 90 04 06943 7 Architectonic Space ISBN 90 04 09639 6 Der architectonische Raum German ISBN 90 04 09020 7 L'espace architectonique French *Mystery and Matter* Michel Remery, 2010-12-20 Taking an interdisciplinary approach and based on yet unexplored sources this book offers a new synthesis of the theory and works of the Dutch monk and architect Dom Hans van der Laan from the perspective of the interrelationship between liturgy and architecture **The Turn to Transcendence** Glenn W. Olsen, 2012-07-30

Phenomenal A must read for us who desire to topple the dictatorship of relativism and culture of death and replace it with the only alternative The Imaginative Conservative Especially concerned with the public nature of religion historian Glenn W Olsen author of *Christian Marriage A Historical Study* and *On the Road to Emmaus* The Catholic Dialogue with American and Modernity sets forth an exhaustively researched and persuasive account of how religion has been reshaped in the modern period The Turn to Transcendence traces both the loss of transcendence and attempts to recover it while making its own proposals Neither reactionary nor modernist it questions how under conditions of modern life some form of the sacred and some form of the secular might both flourish at the same time But it also provides a warning that a religion unable to maintain itself with its own overt architecture language and calendars against an enveloping secular culture is destined for oblivion Glenn Olsen's book could hardly be more pivotal or insightful Confronting the growing amnesia regarding culture's religious origin and transcendent purpose Olsen proves both a masterful cartographer of modernity and a visionary of a culture that encourages and enables us to seek beyond ourselves Carl A Anderson Supreme Knight of the Knights of Columbus A brilliant book It rests on an amazing amount of scholarship that is wide ranging in history literature art science music theology and philosophy James Hitchcock professor of history St Louis University **Hans van der Laan's**

Instruments of Thought Tiziana Proietti, Kees Biesen, 2024-07-26 The work of the Dutch Benedictine monk and architect Hans van der Laan 1904-1991 offers important insights into the ways in which artifacts address the complexity of human

physical cognitive and social needs Van der Laan developed a number of powerful lines of thought three of which are introduced here the search for a theory of architecture the establishment of a three dimensional system of proportions named Plastic Number and analogy as the mainspring of human thinking This triad of deeply interconnected intellectual strategies represents his most important instruments of thought and is rooted in the careful observation of phenomena as they are presented to us rather than relying on conventional beliefs Van der Laan s instruments of thought lead us to reconsider the origins of human creation urging a deeper examination of our perceptual and cognitive response to the limitlessness of the surrounding environment On this basis Van der Laan develops a unique philosophy of culture and design that includes considerations on the relationship between nature culture and religious ritual Although this book is informative its principal aim is to be formative On the basis of Van der Laan s instruments of thought the authors develop a methodology to explore the Plastic Number theory and the many ways in which we perceive and interpret proportion Reintroducing playful creativity and intellectual exploration into architectural pedagogy and design practice this book is a gateway for a deeper understanding of the effects of the built environment on human behavior and the various ways in which the human mind perceives and decodes artifacts

Tourism and Culture in Philosophical Perspective Marie-Élise Zovko, John Dillon, 2023-11-10 This book offers a philosophical approach to tourism as a permanent factor in the lifestyle economy and culture of the contemporary global community Travel to well known destinations and pursuit of an ever increasing range of leisure activities are an aspiration of most humans today Those not themselves engaged in tourist activities are quite often involved in providing the goods and services which make tourism possible Yet the ill effects of mass tourism and overtourism on sensitive ecosystems resources and community life have begun to outweigh economic gains threatening to destroy destinations cultural heritage and livelihoods The editors and contributors of this collection reflect on the nature and meaning of tourism its history elements and forms the roles of tourist and host the limits of hospitality tendencies to excess and the reasons why we engage in such forms of behaviour and the place of tourism in human culture as a whole By shedding

light on these questions more efficacious solutions to the urgent problems raised by the practice of tourism can be found This work is a must read for scholars teachers and students engaged in study and research on philosophy of culture philosophical anthropology tourist and destination management human factors engineering and sustainability **American Book Publishing Record** ,2003 **The Problem with Grace** Vincent Lloyd,2011-04-04 This book develops a post secular post sectarian political theology taking that burgeoning field in a new direction With his bold suggestion that political philosophy must begin with political theology Vincent Lloyd investigates a series of religious concepts such as love faith liturgy and revelation and explores their political relevance by extracting them from their Christian theological context while refusing to reduce them to secular terms He assembles an unusual canon of thinkers too Jewish to be Christian and too Christian to be Jewish Simone Weil James Baldwin Franz Kafka and Gillian Rose to aid him in his explorations Unique in its serious attention to both theological writing about politics and the work of academic philosophers and theorists *The Problem with Grace* deepens our understanding of political theological vocabulary as a way back to the everyday world Politics is not about redemption but about grappling with the ever present difficulties tragedies and comedies of ordinary life **Christian Rite and Christian Drama in the Middle Ages** O. B. Hardison Jr.,2019-12-01 Originally published in 1965 The European dramatic tradition rests on a group of religious dramas that appeared between the tenth and twelfth centuries These dramas of interest in themselves are also important for the light they shed on three historical and critical problems the relation of drama to ritual the nature of dramatic form and the development of representational techniques Hardison s approach is based on the history of the Christian liturgy on critical theories concerning the kinship of ritual and drama and on close analysis of the chronology and content of the texts themselves Beginning with liturgical commentaries of the ninth century Hardison shows that writers of the period consciously interpreted the Mass and cycle of the church year in dramatic terms By reconstructing the services themselves he shows that they had an emphatic dramatic structure that reached its climax with the celebration of the Resurrection Turning to the history of the Latin Resurrection play Hardison suggests that the famous *Quem quaeritis* the earliest of all medieval dramas is best understood in relation to the baptismal rites of the Easter Vigil service He sets forth a theory of the original form and function of the play based on the content of the earliest manuscripts as well as on vestigial ceremonial elements that survive in the later ones Three texts from the eleventh and twelfth centuries are analyzed with emphasis on the change from ritual to representational modes Hardison discusses why the form inherited from ritual remained unchanged while the technique became increasingly representational In studying the earliest vernacular dramas Hardison examines the use of nonritual materials as sources of dramatic form the influence of representational concepts of space and time on staging and the development of nonceremonial techniques for composition of dialogue The sudden appearance of these elements in vernacular drama suggests the existence of a hitherto unsuspected vernacular tradition considerably older than the earliest surviving vernacular plays
