The Entrepreneurial State in China Jane Duckett, 2006-10-19 Jane Duckett describes in detail new state business activities in China and explains why they have appeared Using research on the northern city of Tianjin during the 1990s she argues that individual departments within the Chinese state are involved in the market economy through the establishment of their own businesses The book demonstrates that many of these businesses are genuinely entrepreneurial in the sense of profit seeking risk taking and productive rather than rent seeking speculative or profiteering This entrepreneurialism is an important new dimension of state activity in China with implications for our understanding of the Chinese state This book develops an alternative to the local government state model and emphasises instead the State's dynamic entrepreneurial role in the process of economic reform

Mandates and Democracy Susan C. Stokes, 2001-08-13 Sometimes politicians run for office promising one set of policies and if they win switch to very different ones Latin American presidents in recent years have frequently run promising to avoid pro market reforms and harsh economic adjustment then win and transform immediately into enthusiastic market reformers Does it matter when politicians ignore the promises they made and the preferences of their constituents If politicians want to be reelected or see their party reelected at the end of their term why would they impose unpopular policies Susan Stokes develops a model of policy switches and tests it with statistical and qualitative data from Latin American elections over the last two decades She concludes that politicians may change policies because unpopular policies are best for constituents and best serve their own political ambitions Nevertheless even though good representatives sometimes switch policies abrupt change tends to erode the quality of democracy
