Essays Bibliography p 423 431 Existentialism Guido De Ruggiero, 2001 An Essay on the Philosophy of Existence Rama Chandra Sen, 2015-06-16 Excerpt from An Essay on the Philosophy of Existence This Philosophy of Existence is only the Philosophy of living Evolution and of living Involution based upon Monadology and upon Mononology It pretends to give the genesis of Un conditioned and of conditioned existence to show how every form of evolved existence is more or less imperfect and to infer how all perfect existence cannot be the final consummation of Evolution It ventures inferentially to apprehend as far as possible the mysterious nature and the infinite Attributes of the All Absolute and it attempts to explain what Man by nature is what by right Self effort he can become without any belief in Moral Responsibility in Sin or Death in Hell or Heaven and in what relation he stands to the All Absolute This Philosophy of Existence gives the law of Self development of Self Control of Self restraint of Self renunciation of Self prolongation and in this law it implicitly gives the law of all true Reform Individual or educational Domestic or moral Social or political Kosmic or religious That this Constructive Philosophy in so concise a form should be free from fault is very far from probable But it is given out as it is with a view to invite fair Reflective Criticism and to elicit higher Super Reflective thought About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **The Philosophy of Existence** Timothy John Hestenes Lehnen, 2008 **Philosophy of Existentialism** Gabriel Marcel, 1947 *The A to Z of Existentialism* Stephen Michelman, 2010-04-01 Existentialism is the philosophy of human existence which flourished first in Germany in the 1920s and 1930s and then in France in the decade following the end of World War II The operative meaning of existentialism here is thus broader than it was circa 1945 when the term first gained currency in France as a label for the philosophy of Jean Paul Sartre However it is considerably less broad than the view proposed by commentators in the 1950s and 1960s who in an attempt to overcome Sartre s hegemony discovered the seeds of existentialism far and wide in Shakespeare Saint Augustine and the Old Testament prophets In this dictionary existentialism is understood as a decidedly

20th century phenomenon though with roots in the 19th century Effort has been made to understand the philosophy of existentialism as all philosophies should be understood as part of an ongoing intellectual tradition an evolving history of problems concepts and arguments The A to Z of Existentialism explains the central claims of existentialist philosophy and the contexts in which it developed into one of the most influential intellectual trends of the 20th century This is done through a chronology an introductory essay a bibliography and more than 300 cross referenced dictionary entries offering clear accessible accounts of the life and thought of major existentialists like Jean Paul Sartre Martin Heidegger Martin Buber Karl Jaspers Gabriel Marcel Simone de Beauvoir Albert Camus and Maurice Merleau Ponty as well as thinkers influential to its development such as Wilhelm Dilthey Henri Bergson Edmund Husserl and Max Scheler This book affords readers an integrated critical and historically sensitive understanding of this important philosophical movement

Human Existence and Transcendence Jean Wahl, 2016-12-15 William C Hackett's English translation of Jean Wahl's *Existence humaine et transcendance* 1944 brings back to life an all but forgotten book that provocatively explores the philosophical concept of transcendence Based on what Emmanuel Levinas called Wahl's famous lecture from 1937 *Existence humaine et transcendance* captured a watershed moment of European philosophy Included in the book are Wahl's remarkable original lecture and the debate that ensued with significant contributions by Gabriel Marcel and Nicolai Berdyaev as well as letters submitted on the occasion by Heidegger Levinas Jaspers and other famous figures from that era Concerned above all with the ineradicable felt value of human experience by which any philosophical thesis is measured Wahl makes a daring clarification of the concept of transcendence and explores its repercussions through a masterly appeal to many often surprising places within the entire history of Western thought Apart from its intrinsic philosophical significance as a discussion of the concepts of being the absolute and transcendence Wahl's work is valuable insofar as it became a focal point for a great many other European intellectuals Hackett has provided an annotated introduction to orient readers to this influential work of twentieth century French philosophy and to one of its key figures
