The Failure of Civil Society? Akihiro Ogawa, 2009-03-09 Winner of the 2010 Japan NPO Research Association Book Award. The global discourse on civil society is both complicated and enriched in this participant study of Japan's volunteers known as the third sector. In the wake of the Japanese government's failed response to the 1995 earthquake, volunteers took the lead in providing aid to victims. This recent sea change in Japanese society was quickly followed by the 1998 NPO Law, nonprofit organization law that encourages third sector activities. Drawing on his fieldwork at one of the new NPOs, Akihiro Ogawa explores in detail the social and historical particularities of Japanese civil society or shimin shakai, revisiting how the concept is interpreted and practiced by the volunteers themselves. Civil society, Ogawa argues, can best be understood as an active dynamic process rather than as a static abstract model. **Department of the Interior and related agencies**

appropriations for fiscal year 1981 United States. Congress. Senate. Committee on Appropriations. Subcommittee on the Department of the Interior and Related Agencies, 1981. *The American Museum of Natural History and How It Got That Way* Colin Davey, Thomas A. Lesser, 2019-05-14 An extensive history of the American Museum of Natural History and Hayden Planetarium featuring a cast of colorful characters. The American Museum of Natural History is one of New York City's most beloved institutions and one of the largest, most celebrated museums in the world. Since 1869, generations of New Yorkers and tourists of all ages have been educated and entertained here. Located across from Central Park, the sprawling structure spanning four city blocks is a fascinating conglomeration of many buildings of diverse architectural styles built over a period of 150 years. The first book to tell the history of the museum from the point of view of these buildings, including the planned Gilder Center. *The American Museum of Natural History and How It Got That Way* contextualizes them within New York and American history and the history of science. Part II: The Heavens in the Attic is the first detailed history of the Hayden Planetarium from the museum's earliest astronomy exhibits to Clyde Fisher and the original planetarium to Neil deGrasse

Tyson and the Rose Center for Earth and Space and it features a photographic tour through the original Hayden Planetarium. Author Colin Davey spent much of his childhood literally and figuratively lost in the museum's labyrinthine hallways. The museum grew in fits and starts according to the vicissitudes of backroom deals, personal agendas, two world wars, the Great Depression, and the Cold War. Chronicling its evolution from the selection of a desolate, rocky, hilly, swampy site known as Manhattan Square to the present day, the book includes some of the most important and colorful characters in the city's history, including the notoriously corrupt and powerful Boss Tweed, Father of New York City, Andrew Haswell Green, and twentieth-century powerbroker and master builder Robert Moses, museum presidents Morris K. Jesup, Henry Fairfield Osborn, and Ellen Futter, and American presidents, polar and African explorers, dinosaur hunters, and German rocket scientists. Features a new preface by the author and a new foreword by Neil deGrasse Tyson. This is in many ways a particularly American story, and anyone interested in history or museums will find this a very satisfying read. Author Colin Davey had a life-long love affair with the museum, growing up in New York and spending many, many hours happily lost in the museum's collections, and that shines through in his writing, as does his fine-in-depth research. Plenty of excellent graphics and photographs support this fascinating history. *Seattle Book Review*
