Smith, 2014-09-19 Few nations rely upon the ocean as much as Japan for livelihood culture and transport The seas have long played a vital role for the Japanese helping to support the economic and social life of a nation that possesses few resources and little arable land and sustain a population that has nearly tripled in the last century Fish are a distinctive feature of the Japanese diet constituting nearly half of all animal protein consumed the highest rate in the world The industry itself has provided an impetus for coastal community growth and national economic development over the past century while fisheries have worked their way into Japanese culture and customs serving as a dominant symbol in traditional arts and folklore This book explores the overarching rationale that motivated Japanese international fisheries policy throughout the post war period until today highlighting the importance of international fisheries to Japan and the stature this resource has occupied as a national interest It provides a comparative view of Japanese foreign policy at various ocean conferences treaty negotiations bilateral diplomatic initiatives and other maritime relations that constitute ocean policy over half a century and investigates the domestic constituents of national policy Roger Smith argues that the rationale for international fisheries policy may be best viewed as deriving from Japan's unique defence strategy for its national interests comprehensive security Encompassing non military elements and most importantly defence of economic interests Japan's international fisheries policy provides an interesting case study of how comprehensive security is conceptualised and carried out Taking a broad view of Japan's international fisheries policies from 1945 to the present this book highlights the key trends in policy motives and means throughout the post war period As such it will be of great interest to students and scholars of Japanese studies international and environmental law resource management and international relations as well as to policy makers working in the field *America's Ocean Wilderness* Gary Kroll, 2008 Examines a handful of famous ocean explorers and naturalists including Jacques Cousteau Thor Heyerdahl and Rachel Carson among others to demonstrate how their work helped shape the way many Americans would think about and interact with the ocean Rationality and the Ideology of Disconnection Michael Taylor, 2006-07-24 A powerful and provocative critique of the foundations of Rational Choice theory and the economic way of thinking about the world written by a former leading practitioner The target is a dehumanizing ideology that cannot properly recognize that normal people have attachments and commitments to other people and to practices projects principles and places which provide them with desire independent reasons for action and that they are reflective creatures who think about what they are and what they should be with ideals that can shape and structure the way they see their choices The author's views are brought to bear on the economic way of thinking about the natural environment and on how and when the norm of fair reciprocity motivates us

to do our part in cooperative endeavors Throughout the argument is adorned by thought provoking examples that keep what is at stake clearly before the reader s mind

Servants of the Fish Myron Arms,2004 As the last of the northern cod disappeared from the fishing banks of eastern North America during the waning years of the 20th century more than just fish faced the threat of extinction In communities all around the island of Newfoundland thousands of fishermen and their families suddenly found themselves confronted by a similar threat *Servants of the Fish* is the story of these people who are at once the perpetrators and the victims of this event As he did in his bestselling *Riddle of the Ice* Arms employs the drama of the voyage to bring readers face to face with the people and the geography of the tale he tells It is the tale of a particular time and place Yet it is also an allegory of sorts about predators and prey about greed and denial and about our collective ability as human beings to destroy natural systems once thought to be infinite
