Political Dimensions of Religion Saïd Amir Arjomand, 1993-08-03 This volume explores the relationship between religion and politics It brings a varied sample of richly detailed comparative and case studies together with a set of analytical paradigms in an integrated framework It is a major statement on a timely subject and a plea for the acknowledgment of normative pluralism as firmly rooted in the history of religion The editor shows that the fact of political diversity in the history of world religions compels the acceptance of pluralism as a normative principle **Muhammad and the Origins of Islam** Francis E. Peters, 1994-01-01 An inquiry into the religious environment of the person Muslims hail as the Envoy of God and an attempt to trace his progress along the path from paganism to that distinctive form of monotheism called Islam *Subject Guide to Books in Print* , 1997 *Whitaker's Books in Print* , 1998 Women and Islamization Karin Ask, Marit Tjomsland, 2021-01-07 The current Islamic revival is frequently associated with fundamentalism and radical politics This reinforces Western perceptions of Islamic women as victims of a sexist and reactionary rule What many outsiders fail to realize is that quite a number of Muslim women are ardently embracing their religion as a means through which they can express gender identity power and creativity In overturning ingrained notions of Muslim women's subjugation this timely book situates Islam as a religion undergoing reinterpretation and change especially in relation to gender identities rather than as a monolithic movement reacting against westernization and modernization Through their political educational and recreational activities more and more Muslim women are setting agendas of their own and are actively redefining the role of women in Muslim society Islam and Competing Nationalisms in the Middle East, 1876-1926 Kamal Soleimani, 2016-06-15 Opposing a binary perspective that consolidates ethnicity religion and nationalism into separate spheres this book demonstrates that neither nationalism nor religion can be studied in isolation in the Middle East Religious interpretation like other systems of meaning production is affected by its historical and political contexts and the processes of interpretation and religious translation bleed into the institutional discourses and processes of nation building This book calls into question the foundational epistemologies of the nation state by centering on the pivotal and intimate role Islam played in the emergence of the nation state showing the entanglements and reciprocities of nationalism and religious thought as they played out in the late nineteenth and early twentieth century Middle East
