The Political Economy Of Reform:

The Political Economy of Reform Failure Mats Lundahl, 2007-04-11 Economists have moved in recent years beyond analyzing the manner in which the macroeconomies of different countries function and prescribing appropriate policies for dealing with domestic and external imbalances. Increasingly they have sought to understand the complex interaction between political and economic phenomena. This book considers issues of economic reform in a broad range of settings: developed countries, transition countries, developing countries. Using country specific cases such as Uzbekistan, Burma, and Haiti, it focuses on those territories which have encountered problems reforming, allowing the reader to gain an accurate understanding of the factors that inhibit the success of economic reform, the different context in which economic reform is attempted, and the different challenges that individual countries face. An international team of contributors including Bo Sodersten, Deepak Lal, and Ron Findlay have been brought together to analyze these topical issues, making this an informative and thought provoking book of interest to those involved in the field of development studies.

The Political Economy of Reform Federico Sturzenegger, Mariano Tommasi, 1998 In this book Federico Sturzenegger and Mariano Tommasi propose formal models to answer some of the questions raised by the recent reform experience of many Latin American and eastern European countries.

Political Economy of Reform and Change Jan Winiecki, 1997 This book was a crucial time frame in Europe's history, i.e. the period of decline and collapse of communist economic order and later the emergence of the capitalist economic order in the post communist Eastern Europe. Although the last text in this book concerns Poland, the situation apart from some Poland specific developments is not drastically different elsewhere.

The Political Economy of Reform in Post-Mao China Elizabeth J. Perry, Christine Wong, 2020-10-26 In December 1978 the Chinese Communist Party announced dramatic changes in policy for both agriculture and industry that seemed to repudiate the Maoist road to socialism in favor of certain capitalist tendencies. The motives behind these changes, the nature of the reforms, and their effects upon the economy and political life of countryside and city are here analyzed by five political scientists and five economists. Their assessments of ongoing efforts to implement the new policies provide a timely survey of what is currently happening in China. Part One delineates the content of agricultural reforms, including decollectivization and the provisions for households to realize private profits, and examines their impact on production, marketing, peasant income, family planning, local leadership, and rural violence. Part Two examines the evolution of industrial reforms, centering on enterprise profit retention and their impact on political conflict, resource allocation, investment, material and financial flows, industrial structure, and composition of output. Through all ten chapters, one theme is conspicuous: the multiple interactions between politics and economics in China's new directions since the Cultural Revolution.

The Political Economy of Reform: Lessons from Pensions, Product Markets and Labour Markets in Ten OECD Countries Thompson William, 2009-08-24 By looking at 20 reform efforts in ten OECD countries, this report examines why some reforms are implemented and others languish.

Where are We in the Political Economy

of Reform? Mariano Tommasi, 1995 *The Political Economy of Policy Reform* John Williamson, 1994 Policymakers around the world have increasingly agreed that macroeconomic discipline microeconomic liberalization and outward orientation are prerequisites for economic success But what are the political conditions that make economic transformation possible At a conference held at the Institute for International Economics leaders of economic reform recounted their efforts to bring about change and discussed the impact of the political climate on the success of their efforts In this book these leaders explore the political conditions conducive to the success of policy reforms Did economic crisis strengthen the hands of the reformers Was the rapidity with which reforms were instituted crucial Did the reformers have a honeymoon period in which to transform the economy The authors answer these and other questions as well as providing first hand accounts of the politically charged atmosphere surrounding reform efforts in their countries **The Political Economy of Reform Failure** Mats Lundahl, 2007-04-11 Economists have moved in recent years beyond analyzing the manner in which the macroeconomies of different countries function and prescribing appropriate policies for dealing with domestic and external imbalances Increasingly they have sought to understand the complex interaction between political and economic phenomena This book considers issues of economic reform in a broad range of settings developed countries transition countries developing countries Using country specific cases such as Uzbekistan Burma and Haiti it focuses on those territories which have encountered problems reforming allowing the reader to gain an accurate understanding of the factors that inhibit the success of economic reform the different context in which economic reform is attempted and the different challenges that individual countries face An international team of contributors including Bo S dersten Deepak Lal and Ron Findlay have been brought together to analyze these topical issues making this an informative and thought provoking book of interest to those involved in the field of development studies **Three Essays on the Political Economy of Reform** Bogdan Catalin Buduru, 2007 The purpose of this thesis is to investigate the transition toward a market economy from a political economy perspective The goal is to trace the link between the polity formation process and successful economic reform by identifying the factors that favour or hinder the adjustment efforts The first essay entitled Determinants of Success in Transition accounts for the dissimilar economic trajectories of transition countries The aim is to show why the ability to implement reforms is different across countries A bargaining framework is used to model the political sector The key endogenous variables are the size of the asset transfer to the private sector and the magnitude of the compensation payments The main exogenous variables are the relative bargaining power the magnitude of the threat points and the transaction costs of providing compensation The most important theoretical result shows that the higher the opposition s threat point and bargaining power the larger the asset transfer The second essay entitled Initial Conditions and Economic Reform is an empirical study exploring the impact of a comprehensive set of factors on the ability to initiate and implement economic reforms by countries in transition The variables measuring these factors belong to three groups characterizing the

macroeconomic and structural distortions inherited at the start of transition the competitiveness of the political markets at the polity defining stage and the elements affecting the ability to solve coordination and collective action problems While the regression analysis finds that variables from all groups influence capacity for reform the factors characterizing the behaviour of the political market at the onset of transition played a central role The third essay entitled Transaction Costs Strategic Interaction and Farm Restructuring offers a transaction cost explanation for the different paths of organizational adjustment in the case of the former state and collective farms in Czech Republic The focus is on the strategic interaction among the stakeholders in large scale agricultural organizations In the presence of a neutral institutional environment the number of players involved in the intra organizational process their ability to make collective decisions and their perceived payoffs in alternative farming structures determine the restructuring outcome
