implementation of this new approach in the most important business sectors as a replacement for previous ineffective codes of conduct which have failed. It is a must read for business students with aspirations of becoming managers or entrepreneurs in the economic sector as well as for all young professionals, managers and entrepreneurs to improve their ethical performance and sustainable success.

Message from the author: This book creates an impetus for change in a business world where unethical practices are rampant by providing a suggested New Integral Ethics for the economy, an ethical approach based upon inner psychological and spiritual development arising from a serious consideration of Depth Psychology. Readers will learn how adoption of specific Practices which lead to inner growth and spiritual maturity will result in ethical, morally sound business practices, not because they are mandated but because once the SELF is actualized, you cannot do otherwise. Laws, appeals and directives which have never successfully resulted in ethical practices become unnecessary, replaced by intrinsically ethical individuals who collectively influence corporate ethical behaviour. This is a giant leap into a new dimension in our globalized, digitized economy.

Business Ethics 3.0 by Erhard Meyer Galow provides a much needed beacon of light to a segment of our society that seems to be sinking deeper and deeper into darkness. The term business ethics, once an important topic within the business community, has slowly descended through the fog of profitable ends justifying unprincipled means to become nothing more than a self-contradictory oxymoron, especially among large international corporations. In **Business Ethics 3.0**, Erhard Meyer Galow has taken a fresh approach that appeals to individual personal growth rather than the usual proffering of academic arguments that are not implementable in the real world of relentless Machiavellian competition. Only through raising and improving individual awareness and responsibility can real long-term change have a chance of developing.

Business Ethics 3.0 is on the right track with a positive and compelling message; may it succeed where the academics have failed.
