Supergrowth Companies Entrepreneurs In Action:

Supergrowth Companies John Harrison, Bernard Taylor, Ann Todd, Mahen Tampoe, 1996 Supergrowth Companies is based on extensive research following the progress of over 200 businesses including Anita Roddick and The Body Shop and Alan Sugar and Amstrad. It features interviews with company executives and a collection of over fifty case studies. It also reports on ten years of research involving fifteen researchers in Britain and Germany and producing guidelines concerning new business opportunities, growth strategies, leadership styles, organization expansion, overseas expansion strategies for service businesses, managing risk and uncertainty. Supergrowth Companies is aimed primarily at managers and entrepreneurs who want to learn from the experience of a wide range of businesses so that theirs may grow faster and more profitably. It will also be of interest to students of business growth and managers on corporate development programmes. Based on original research from Henley Management College, Bernard Taylor is the well-known and widely respected author and editor of Long Range Planning, a key Elsevier business journal. Medium-sized companies are very much in vogue as acquisition targets and as having the most growth potential in the future.

Growth-Oriented Entrepreneurship Alan S. Gutterman, 2018-08-30 This book provides an extensive introduction to research on growth-oriented entrepreneurship. A number of different methods have been used to describe growth-oriented entrepreneurship; however, there is a consensus that there is a particularly desirable form of entrepreneurship that seeks to create and scale up businesses that will drive productivity growth, create new employment, increase innovation, promote business internationalization, and achieve sustainable economic growth. Innovation is a condition of growth-oriented entrepreneurship that includes both the development and commercialization of new products and services and the development and implementation of new or improved processes that enhance productivity or reduce costs associated with manufacturing or distributing existing products. Innovation involves firms pursuing distinctive business strategies and doing new things in new ways to increase productivity, product development, sales, and profitability, including finding and developing new ways of identifying the needs of new and existing customers and making and marketing products that satisfy those needs. The goal of the launch phase for growth-oriented entrepreneurial ventures is to reach the point of scale-up and common goals and activities associated with the launch phase include market disruption and penetration, gaining access to capital and markets, and mentorship opportunities, organizational growth through management capacity, systems resources (i.e., people, product, and assets), management embedding, organizational culture development, stakeholder relationships, monitoring and evaluation, and governance and reporting. This book provides an extensive introduction to research on growth-oriented entrepreneurship and continues with an assessment of attempts to create the appropriate framework conditions for growth-oriented entrepreneurship to flourish and sustain, including financial support, government policies, government programs, education, and training, research and development, transfer, commercial and professional infrastructure, internal market openness, access

to physical infrastructure cultural and social norms and protection of intellectual property rights The final chapter looks at growth oriented entrepreneurs in practice as they work to launch and grow emerging companies This book is a unique compendium of research and analysis on a dynamic and important segment of entrepreneurship and will be useful to entrepreneurs academics and policymakers **Small Business** D. J. Storey,2000 *Analysis of Senior Management Teams that Have Demonstrated a Proclivity for Growth* David Thomas,2010-04-20 This book is a PhD thesis that is highly relevant to anyone involved in management It identifies and analyses in depth the key constructs of leadership teamwork and enterprise that are vital for a successful growth business The focus is on leadership enterprise and the make up of senior management teams but the research outcomes can equally be applied to any management team environment such as committees working groups panels or administrative bodies Critically an unsuitable leader will almost guarantee failure so having the ability to recognise leaders that are capable of delivering success is crucial This book is invaluable for those people who need to understand how leadership teamwork and enterprise interact to create dynamic and highly successful management teams
