The Supervision of Instruction Hubert Wilbur Nutt,1920 The following discussion and analysis of the elements of the supervisory process and statement of the technique and professional standards for the supervision of instruction will be read with interest by those who are concerned with the work of school supervision The fundamental purpose of all school supervision is to increase the efficiency of the classroom teacher For a supervisor to be constructively critical and helpful requires a good understanding of both the purposes and the technique of supervision and the fundamental principles and methods underlying such helpful and constructive service the author of the present volume has here set forth *Supervision of Instruction* Glen G. Eye,Lanore A. Netzer,1965 Both those who are beginners and those who have spent many years in studying the purposes and processes of administration may well be intrigued with this book It deals with the heart of all efforts to provide a sound educational program The title itself cuts through the core of the administrative enterprise Administration always has had the responsibility of encouraging maximum accomplishment in both learning and teaching This book is particularly focused on the administrative responsibilities of the instructional program Many books in administration deal mainly with the non instructional tasks and many books in supervision deal with the non managerial tasks But both apparently deal with esoteric tasks which constitute ends rather than means The refreshing and refreshingly different aspects of this book are the amalgamations of instructional and managerial concerns as integral parts of administration Those who wish to question their own professional efforts will find in this book not only an incentive for increased purposeful activities but also an opportunity to structure and appraise their own behaviors as instruments for instructional improvement Introduction John Guy Fowlkes **Principals Improving Instruction** Michael DiPaola,Wayne K. Hoy,2013-05-01 This work integrates the core instructional leadership tasks of all principals supervision evaluation and professional development The text demonstrates a hands on approach grounded in sound theory and rigorous research It provides both a conceptual frame and realistic exercises that today s principals and supervisors can use to improve their practice The book highlights observation tools that focus on high yield instructional strategies Principals and supervisors are encouraged to collect data in classrooms and provide this instructional feedback so together with teachers they can reflect and identify areas for growth The models of supervision evaluation and professional development are research based and are consistent with contemporary challenges that confront principals and others committed to improving instruction
