Supply Chain Management Based on SAP Systems Gerhard F. Knolmayer, Peter Mertens, Alexander Zeier, 2012-11-02

In recent years Supply Chain Management SCM has become one of the most widely discussed issues on top management's agenda. One essential precondition for the implementation of SCM concepts are powerful information systems. Many manufacturing companies deploy the logistics modules of the SAP R/3 system. In 1997 SAP enlarged its focus beyond Enterprise Resource Planning (ERP) systems and started an SCM initiative which resulted in the Advanced Planner and Optimizer (APO) system. Today APO has become one of the main components of the mySAP.com solutions. This book describes the principles and methods of intra and inter company SCM with reference to Release 4.6 of the SAP R/3 and to Release 3.0 of the SAP APO system. It also discusses potential future developments of these widely used software systems. The final chapter of the book contains an annotated overview of the most valuable online resources dealing with SCM.

Inter-organizational Cooperation with SAP Solutions Peter Buxmann, Wolfgang König, 2013-11-11 Inter-organizational cooperation has become increasingly important in firms' strategies. This book provides a brief introduction to the theory of cooperation and the foundations of logistics service management and supply chain management. The main focus of the book, however, is to examine the use of SAP systems for supporting inter-organizational cooperation in particular supply chain coordination. The authors present both well-known logistics solutions, e.g. EDI, and the implementations of state-of-the-art supply chain solutions using SAP systems such as mySAP.com, SAP APO, SAP LES, SAP BBP, SAP Business Information Warehouse and Internet Applications. In particular, the book contains a number of case studies which show the application of the systems in practice. Proceedings of the XVI International Symposium Symorg 2018 Nevenka Žarkić-Joksimović, Sanja Marinković, 2018-06-12 Agile Supply Chain Remko Ivan Hoek, 2006 For the guest editor Remko Ivan Hoek in the field of logistics, the debate between the lean thinkers and those who advocate agility is still very much alive. This special issue follows the International Conference on Agility in Helsinki, Finland, and is a collection of some of the best of the fifty papers presented there. The papers touch on agility in regards to forecasting, manufacturing simulation, ERP, and Chinese sourcing. The result is that the concept of agility can be considered as a practical path forward rather than just a topic of academic debate. *Retail Information Systems Based on SAP Products* Jörg Becker, Wolfgang Uhr, Oliver Vering, 2013-03-09

Concentration tendencies, globalization, increasing cost pressure, and well-informed customers all make up the hard competition faced by today's businesses. The right products, a successful market image, a strong positioning between suppliers and customers, efficient logistics, and optimum organization structures contribute to a company's survival. Achieving this goal requires flexible information and communication systems that are fully adaptable to the specific situation.
