Supports N. J. Habraken, 1972 *Supports: an Alternative to Mass Housing* John Habraken, 1985 **Supports, an Alternative to Mass Housing** N. J. Habraken, 1972 **Supports** N. J. Habraken, Jonathan Teicher, Ben Valkenburg, 1999-01-01 **Supports** N.J. Habraken, 1972 **Design for Adaptability in Mass Housing** Guopeng Li, 2020-11-05 Before discussing the research itself in greater depth it is beneficial at this stage to introduce the background to the research To do so the chapter is divided into four parts The first part of the chapter summarises terminologies associated with adaptability and goes on to define and elaborate on the meaning of adaptability in this research study The second part of this chapter defines mass housing the development of mass housing and its problems are also illustrated In the third part as the key solution for addressing housing occupants requirements and accommodating changes the importance of adaptability in improving overall housing quality particularly from a social financial and environmental point of view is outlined The sustainability of adaptability is also discussed Even though studies of adaptability have been developed structurally functionally technically and financially adaptability still occupies a marginal position due to the production of mass housing The final part of the chapter rethinks the notion of adaptability for mass housing Factors of mass housing related to social financial technical and design issues and which address adaptability are explored Lastly it is revealed that the design aspect of adaptability is chosen as the research focus in this research study *The Short Works of John Habraken* Stephen H. Kendall, John R. Dale, 2023-03-31 This book offers for the first time access to the chronological arc of John Habraken's writing in a single collection Few architects or scholars have so consistently and patiently pursued such a humane and culturally vital set of radical questions related to the behaviour of the built environment as N John Habraken From the publication of his first book in 1960 he has quietly helped redraw the map of architectural research education practice design methods and theory His insights lead us to a better understanding of how the built field works contributing to the development of methods enabling professionals to contribute to its coherence and resilience Following an introductory essay by the editors placing Habraken's work in context this collection is organized in two sections and further organized around a number of specific themes The Built Field Role of the Architect Control Sharing Forms Examples of Ways of Doing Open Building Tools and Cultivating the Built Environment A series of interviews with the author enable him to reflect on his journey of inquiry research advocacy and teaching and the relationship between ways of seeing and ways of doing Offering theoretical perspectives and methodological ways forward this book will be of interest to architects planners and urban designers tackling the challenges of the contemporary built environment that Habraken identifies as well as educators and students *Architecture and Participation* Peter Blundell Jones, Doina Petrescu, Jeremy Till, 2013-07-04 Bringing together leading international practitioners and theorists in the field ranging from the 1960s pioneers of participation to some of the major contemporary figures in the field *Architecture and Participation* opens up the social and political aspects of our built

environment and the way that the eventual users may shape it Divided into three sections looking at the politics histories and practices of participation the book gives both a broad theoretical background and more direct examples of participation in practice Respectively the book explores participation s broader context outlining key themes and including work from some seminal European figures and shows examples of how leading practitioners have put their ideas into action Illustrated throughout the authors present to students practitioners and policy makers an exploration of how a participative approach may lead to new spatial conditions as well as to new types of architectural practices and investigates the way that the user has been included in the design process

Discrimination by Design Leslie Weisman,1994 Discrimination by Design is a fascinating account of the complex social processes and power struggles involved in building and controlling space Leslie Kanes Weisman offers a new framework for understanding the spatial dimensions of gender and race as well as class She traces the social and architectural histories of the skyscraper maternity hospital department store shopping mall nuclear family dream house and public housing high rise Her vivid prose is based on exhaustive research and documents how each setting along with public parks and streets embodies and transmits the privileges and penalties of social caste In presenting feminist themes from a spatial perspective Weisman raises many new and important questions When do women feel unsafe in cities and why Why do so many homeless people prefer to sleep on the streets rather than in city run shelters Why does the current housing crisis pose a greater threat to women than to men How would dwellings communities and public buildings look if they were designed to foster relationships of equality and environmental wholeness And how can we begin to imagine such a radically different landscape In exploring the answers the author introduces us to the people policies architectural innovations and ideologies working today to shape a future in which all people matter Richly illustrated with photographs and drawings Discrimination by Design is an invaluable and pioneering contribution to our understanding of the issues of our time health care for the elderly and people with AIDS homelessness racial justice changing conditions of work and family life affordable housing militarism energy conservation and thepreservation of the environment This thoroughly readable book provides practical guidance to policymakers architects planners and housing activists It should be read by all who are interested in understanding how the built environment shapes the experiences of their daily lives and the cultural assumptions in which they are immersed

Future Forms and Design For Sustainable Cities Mike Jenks,Nicola Dempsey,2006-08-11 Concentrating on the planning and design of cities the three sections take a logical route through the discussion from the broad considerations at regional and city scale to the larger city at high and lower densities through to design considerations on the smaller block scale Key design issues such as access to facilities access for sunlight life cycle analyses and the impact of communications on urban design are tackled and in conclusion the research is compared to large scale design examples that have been proposed and or implemented over the past decade to give a vision for the future that might be achievable
