Suppressing the Diseases of Animals and Man Claude Ernest Dolman, Richard J. Wolfe, 2003 Based primarily on personal papers and correspondence that have remained in the possession of Smith's family this is a biography of Theobald Smith widely considered to be America's first significant medical scientist and a leading comparative pathologist *Frederick Novy and the Development of Bacteriology in Medicine* Powel Harold Kazanjian, 2017-04-30 At the turn of the twentieth century Frederick Novy was the leader among a new breed of full time bacteriologists at American medical schools Although historians have examined bacteriologic work done in American health department laboratories there has been little examination of similar work completed within U S medical schools during this period In *Frederick Novy and the Development of Bacteriology in Medicine* medical historian medical researcher and clinician Powel H Kazanjian uses Novy's archived letters laboratory notebooks lecture notes and published works to examine medical research and educational activities at the University of Michigan and other key medical schools during a formative period in modern medical science **Salmonella Infections, Networks of Knowledge, and Public Health in Britain, 1880-1975** Anne Hardy, 2015 The first scholarly history of food poisoning telling of the discovery of food poisoning as a public health problem in the 1880s of the discovery of pathways of infection and of the Salmonella family and of the realisation that these organisms are deeply embedded in human and animal food chains and the subsequent importance of food hygiene Arresting Contagion Alan L. Olmstead, Paul W. Rhode, 2015-02-09 Sixty percent of infectious human diseases are shared with other vertebrates Alan Olmstead and Paul Rhode tell how innovations to combat livestock infections border control food inspection drug regulation federal research labs turned the U S into a world leader in combatting communicable diseases and remain central to public health policy

The Oxford Handbook of Environmental History Andrew C. Isenberg, 2017 The Oxford Handbook of Environmental History draws on a wealth of new scholarship to offer diverse perspectives on the state of the field **Maplecrest Turkey Farms, Inc.: A. C. Gingerich & the Turkey Industry in Wellman, Iowa** Gordon W. Miller, 2016-06-20 In the late 1920s until 1965 Maplecrest Turkey Farms of Wellman Iowa was a leading pioneer in the modern commercial turkey industry A C Gingerich an Amish Mennonite farmer and entrepreneur was able to successfully develop his business from a handful of turkeys to make Wellman both a Turkey Capital Center of the World and have it uniquely proclaimed as Thanksgiving Town by the late 1930s The Maplecrest brand was known for its premium quality and was available by name in leading restaurants also by the late 1930s This historical book looks at how the modern turkey industry was able to initiate itself largely through knowledge of disease prevention through sanitation means Some chapters include topics such as how the turkeys were raised processed and marketed especially to Eastern markets e g New York City Boston etc and a chapter on World War II discusses the major role that Maplecrest played in producing not only turkeys but beef pork and lamb for the armed forces 219pp color illus index Masthof Press 2016 **Making Catfish Bait Out of Government Boys** Claire Strom, 2009 This

first full length study of the cattle tick eradication program in the United States offers a new perspective on the fate of the yeomanry in the twentieth century South during a period when state and federal governments were both increasing and centralizing their authority As Claire Strom relates the power struggles that complicated efforts to wipe out the Boophilus tick she explains the motivations and concerns of each group involved including large and small scale cattle farmers scientists and officials at all levels of government In the remote rural South such as the piney woods of south Georgia and north Florida resistance to mandatory treatment of cattle was unusually strong and sometimes violent Cattle often ranged free and their owners raised them mostly for local use rather than faraway markets Cattle farmers in such areas shows Strom perceived a double threat in tick eradication mandates In addition to their added costs eradication schemes with their top down imposition of government expertise were anathema to the yeomanry's notions of liberty Strom contextualizes her southern focus within the national scale of the cattle industry discussing for instance the contentious place of cattle drives in American agricultural history Because Mexico was the primary source of potential tick reinfestation Strom examines the political and environmental history of the Rio Grande giving the book a transnational perspective Debates about the political and economic culture of small farmers have tended to focus on earlier periods in American history Here Strom shows that pockets of yeoman culture survived into the twentieth century and that these communities had the power to block if only temporarily the expansion of the American state
