R. Langslow, 2000-06-08 Despite the ubiquitous importance of medicine in Roman literature philosophy and social history the language of Latin medical texts has not been properly studied This book presents the first systematic account of a part of this large rich field Concentrating on texts of high medicine written in educated even literary Latin Professor Langslow offers a detailed linguistic profile of the medical terminology of Celsus and Scribonius Largus first century AD and Theodorus Priscianus and Cassius Felix fifth century AD with frequent comparisons with their respective near contemporaries The linguistic focus is on vocabulary and word formation and the book thus addresses the large question of the possible and the preferred means of extending the vocabulary in Latin at the beginning and end of the Empire Some syntactic issues including word order and nominalization are also discussed and sections on the sociolinguistic background and stylistic features consider the question to what extent we may speak of medical Latin in the strong sense as the language of a group and draw comparisons and contrasts between ancient and modern technical languages **The Guild Book of the Barbers and Surgeons of York (British Library, Egerton MS 2572)** Richard D. Wragg, 2021 A new exploration of the secular manuscripts and medieval medical texts associated with the York Guild and its members Produced in 1486 and subsequently augmented the Guild Book of the Barbers and Surgeons of York British Library Egerton MS 2572 is a unique record of the knowledge ambitions activities and civic relationships maintained by the Barbers and Surgeons Guild over a period of 300 years The manuscript s earliest folios contain images astrological tracts a plague treatise and a bloodletting poem To these

were added early modern ordinances and oaths a series of royal portraits and the names of the Guild's masters and apprentices It is a rare survival of late medieval medical knowledge placed within a civic context This new multi disciplinary examination of the York Guild Book presents a comprehensive edition of its content and a detailed study of the creation and use of this fascinating manuscript The York Guild Book was not owned by any one person but was intended to be representative of the types of manuscripts the Guild's members might have individually possessed The Guild's commission elevated their manuscript's functional content into something which could be proudly owned and displayed as is demonstrated by the stylishly executed pen and ink drawings two of which are possibly unique Through a contextualisation of the form and content of the manuscript the book articulates ideas about material culture and the ceremonial role of secular manuscripts whilst shedding new light on the dissemination and status of medieval medical texts
