Surgery In The Aged Seventy Five Years Of Age And Over:

Words on Aging United States. Department of Health, Education, and Welfare. Library,1970 Annotated references of selected articles 1963 1967 and books 1900 1967 1968 about aging Includes government documents and reports Legislation not covered Entries arranged by broad topics Author subject indexes Complements previous publications Aging in the modern world 1964 and Selected references on aging 1959 **Surgery in the Aged** Lazar J. Greenfield,1975 **A World Growing Old** Daniel Callahan,1996-08-01 For much of the developed world health care for a surging elderly population looms as one of the most daunting problems of the coming decade In this book contributors from diverse disciplinary backgrounds and countries discuss resource allocation for the elderly and debate plans for the years ahead Essays focus on five general issues the meaning of old age the goals of medicine and health care for the elderly the balance between the needs of the young and old the pressures of other social priorities and the role of families especially the burden on women in long term care In consideration of the difficult moral and practical issues involved the editors conclude the volume with a special report containing policy recommendations from representatives of eight countries the United States Belgium the Czech Republic Germany Hungary the Netherlands Sweden and the United Kingdom This important volume will be of interest to policymakers and a broad spectrum of health care professionals as well as to anyone interested in the fate of the elderly or in coming health care challenges *The American Journal of Surgery* ,1906 Includes the papers and or proceedings of various surgical associations **Principles and Practice of Geriatric Surgery** Ronnie Ann Rosenthal,Michael E. Zenilman,Mark R. Katlic,2013-06-29 More than two decades ago in response to the special healthcare needs of the aging American population interest in the field of geriatric medicine began to grow and blossom in the United States In 1984 and 1985 under the editorial leadership of Christine K Cassel and William R Hazzard respectively two major textbooks devoted to the medical care of aged patients were published These scholarly comprehensive texts provided insight into the principles of aging and guidance in the care of the geriatric patient Three editions later the need to understand the special issues involved in the medical care of the elderly is widely accepted by internists primary care providers and medical specialists For the editors of this book the special issues involved in the surgical care of the elderly have been apparent for nearly as long Although there have been a few scholarly texts on the subject including one in 1990 by Mark R Katlic general acceptance of the concept of geriatric surgery by our surgical and medical colleagues has however lagged This is not the result of a proportionately smaller number of older patients with surgical disease because cancer cardiovascular disease and orthopedic problems are diseases of the aged It is rather the result of uncertainty about the value of surgery in the elderly and concerns about the risks of operations In the past such concerns prevented primary care givers from referring patients for surgical care and prevented surgeons from agreeing to operate **Lives at Risk** John C. Goodman,Gerald L. Musgrave,Devon M. Herrick,2004-08-13 Virtually everyone agrees that our health care system needs reform But what kind of

reform Some want a return to the system that prevailed in the 1950s Others would like to see the adaptation of the government run systems prevalent in other countries The latter national health insurance or single payer health insurance appears to be gaining ground in the United States Before Americans find themselves participating in a health care system that has failed in every country it was adopted we should be asking ourselves whether such a system is effective and efficient In *Lives at Risk* the authors examine the critical failures of national health insurance systems without focusing on minor blemishes or easily correctable problems In doing so the purpose is to identify the problems common to all countries with national health insurance and to explain why these problems emerge Most national health care systems are in a state of sustained internal crisis as costs rise and the stated goals of universal access and quality care are not met In almost all cases the reason is the same the politics of medicine The problems of government run health care systems flow inexorably from the fact that they are government run rather than market driven
