Donna Haraway

The Persistence Of Vision A Dell:

Terminal Identity Scott Bukatman, 1993 Scott Bukatman's *Terminal Identity* referring to both the site of the termination of the conventional subject and the birth of a new subjectivity constructed at the computer terminal or television screen puts to rest any lingering doubts of the significance of science fiction in contemporary cultural studies. Demonstrating a comprehensive knowledge both of the history of science fiction narrative from its earliest origins and of cultural theory and philosophy, Bukatman redefines the nature of human identity in the Information Age. Drawing on a wide range of contemporary theories of the postmodern including Fredric Jameson, Donna Haraway, and Jean Baudrillard, Bukatman begins with the proposition that Western culture is suffering a crisis brought on by advanced electronic technologies. Then in a series of chapters richly supported by analyses of literary texts, visual arts, film, video, television, comics, computer games, and graphics, Bukatman takes the reader on an odyssey that traces the postmodern subject from its current crisis through its close encounters with technology and finally to new self-recognition. This new virtual subject, as Bukatman defines it, situates the human and the technological as coexistent, codependent, and mutually defining. Synthesizing the most provocative theories of postmodern culture with a truly encyclopedic treatment of the relevant media, this volume sets a new standard in the study of science fiction, a category that itself may be redefined in light of this work. Bukatman not only offers the most detailed map to date of the intellectual terrain of postmodern technology studies; he arrives at new frontiers, providing a propitious launching point for further inquiries into the relationship of electronic technology and culture. **The Feminist Standpoint**

Theory Reader Sandra G. Harding, 2004 First Published in 2004 Routledge is an imprint of Taylor & Francis, an information company. *Primate Visions* Donna J. Haraway, 2013-01-11 Haraway's discussions of how scientists have perceived the sexual nature of female primates opens a new chapter in feminist theory, raising unsettling questions about models of the family and of heterosexuality in primate research. **Worlds Enough and Time** Gary Westfahl, George Slusser, David A. Leiby, 2002-06-30 With our lives firmly controlled by the steady pace of time, humans have yearned for ways to escape its constraints, and authors have responded with narratives about traveling far into the past or future, reversing the flow of time, or creating alternate universes where Napoleon was triumphant at Waterloo or the South won the Civil War. Writers ranging from Dante and Lewis Carroll to Philip K. Dick and Martin Amis have probed into the workings of time, and an overwhelming desire to master time reverberates throughout popular culture. This book considers how imaginative works involving time and time travel reflect ongoing scientific concerns and examine the human condition. The scope of the volume is unusually wide, covering such topics as Dante, the major novels of the 19th century, and stories and films of the 1990s. The book concludes with a lengthy bibliography of short stories and novels, films, and television programs, and nonfiction works that feature time travel or speculations about time. With a roster of contributors that includes several of the field's major scholars, this book offers many new insights into this fascinating subject. **Nature & Science on the Pacific Coast**, 1915 Simians,

Cyborgs, and Women Donna Haraway, 2013-05-13 Simians Cyborgs and Women is a powerful collection of ten essays written between 1978 and 1989 Although on the surface simians cyborgs and women may seem an odd threesome Haraway describes their profound link as creatures which have had a great destabilizing place in Western evolutionary technology and biology Throughout this book Haraway analyzes accounts narratives and stories of the creation of nature living organisms and cyborgs At once a social reality and a science fiction the cyborg a hybrid of organism and machine represents transgressed boundaries and intense fusions of the nature culture split By providing an escape from rigid dualisms the cyborg exists in a post gender world and as such holds immense possibilities for modern feminists Haraway s recent book Primate Visions has been called outstanding original and brilliant by leading scholars in the field First published in 1991
