Theory of Populations Alexandr N Tetearing, 2016-11-29 The book is devoted to the theory of development of the biological systems The fundamental equation of life of a biological population based on the general physical principles allows us to get all the basic equations of population dynamics describing the development of the populations under various environmental conditions The equations describe the population transition that occurred in our human population in the late 20 th century This transition may indicate the fact that the human population consists of two super races the old slow race and new fast growing human race that appeared on Earth relatively recently The separate chapter presents the base classification of predator prey systems The classification consists of ninety six different equation systems The book is addressed to a broad auditorium of biologists ecologists and demographers as well as readers interested in the development of the biological populations Translated from Russian

The Unity of a Person Jörg Noller, 2021-09-23 What constitutes personhood How are persons and their bodies related What is the relationship between personhood and value *The Unity of a Person Philosophical Perspectives* explores the current debates surrounding the philosophy of personal identity and offers a fresh approach to this important topic It is original in bringing together three approaches to personal identity that are traditionally treated separately the metaphysical the phenomenological and the social By examining these three areas this volume establishes connections between the underlying metaphysical issues surrounding personal identity and the specific forms of personal existence such as self consciousness action and normativity Topics discussed include personhood and

animalism process ontology self identity over time sociality and personhood and the normative status of personhood With chapters by an outstanding international roster of contributors this collection will be of great interest to those studying personal identity and the nature of the self in metaphysics philosophy of mind and phenomenology **The Predators** Brian Freemantle, 2011-09-13 DIVA sinister ring of child abductors sends the FBI on a frenzied manhunt to save an ambassador's daughter before it's too late divDIV divDIVThe people in the car don't recognize Mary as anything special They see the skinny ten year old as just another young girl on the streets of Brussels not as the daughter of a US ambassador The black car stops and Mary used to having a chauffeur climbs aboard Before she knows what's happening she is on her way to a mansion in Antwerp with a specially designed child sized cell She has been abducted divDIV divDIVNow a team of FBI agents along with Europe's foremost psychological profiler are on the hunt for the girl's captors They must find her before time runs out and Mary is murdered or worse divDIV divDIVThis ebook features an illustrated biography of Brian Freemantle including rare photos from the author's personal collection div **Biotic Interactions in Arid Lands** John L.

Cloudsley-Thompson, 2012-12-06 The exigencies of life in the desert environment have resulted in the selection of a diversity of adaptations both morphological and physiological in the flora and fauna At the same time many plants and most small animals are able not merely to exist but even to thrive under desert conditions mainly by avoiding thermal extremes and by the refinement of pre-existing abilities to economise in water In the same way the biotic interactions of the flora and fauna of the desert do not involve many new principles Nevertheless conditions in arid regions frequently do invoke refinements of the complex interrelations between predators and their prey parasites and their hosts as well as between herbivores and the plants upon which they feed In this book I shall discuss not only such interactions and their feedback effects but also community processes and population dynamics in the desert The physical conditions of the desert that principally affect predators and their prey are its openness and the paucity of cover This is restricted to scattered plants occasional rocks holes and crevices in the ground Furthermore nightfall does not confer relative invisibility as it does in many other ecobiomes because of the clarity of the atmosphere The bright starlight of the desert renders nearby objects visible even to the human eye while an incandescent moon bathes the empty landscape with a flood of silver light Consequently adaptive coloration is functional at all hours of the day and night **Protecting Your Child from Predators** Beth EdD

Robinson, Latayne C. PhD Scott, 2019-08-06 Even good parents often underestimate the dangers their children face Research indicates that one in four females and one in six males are sexually abused before age 18 In most cases the enemy is not a faceless stranger it's someone you know and trust a neighbor a coach or even a family member This book provides practical steps to ensure you're doing all you can to reduce the risks of abuse But since you cannot be with your children 24/7 it goes beyond what you can do as a parent to teach you how to increase your child's own awareness and strategies in the face of potential dangers without making them fearful Dr Robinson whose decades long practice focuses on abused and endangered

children calls on her own case studies to show age appropriate conversation starters for parents teaching them how to ask the right questions and provide the right boundaries This book will help you move from fear to confidence on this heavy topic that is just too important to ignore **Predator Control and Related Problems** United States.
