Weapon Depositions of North-Western Europe Tobias Mörtz, 2024-11-20 The European Bronze Age ca 2200 to 800 BC is characterised by the deposition of metal artefacts in very different compositions and conditions They were usually deliberately abandoned in conspicuous places especially near bodies of water The purposes of these actions continue to be controversially interpreted in archaeological research with the spectrum of suggestions ranging from hidden treasures in times of crisis to concealed caches of craftsmen and traders to ritual offerings to superhuman beings Tobias Mörtz systematically presents a specific group of these so called hoards and discusses their interpretation in a wider cultural scientific context Based on his own investigations of the original artefacts traces of wear and damage are identified on spearheads and swords from Britain France and Ireland indicating their use during violent conflicts and subsequent deliberate destruction by bending breaking crushing and burning The final concealment in wetlands and rivers ruled out a potential retrieval So were they sacrifices after warlike events What role did violence play in the Late Bronze Age Were the rituals also intended to contain it *Bronzization: Essays in Bronze Age Archaeology* Heide W. Nørgaard, Samantha S. Reiter, 2025-02-20 A collection of state of the art articles which integrate new insights from the many advances in research on the subject into a new and up to date vision of the Bronze Age as a Europeanised or even globalised period Papers revise current understanding of bronzization and bronzification in line with a holistic view of recent scientific advances **Bronze Age Landscapes** Joanna Bruck, 2002-02-01 This volume is a collection of essays which exemplify the range and diversity of work currently being undertaken on the regional landscapes of the British Bronze Age and the progress which has been made in both theoretical and interpretive debate Together these papers reflect the vibrancy of current research and promote a closer marriage of landscape site and material culture studies CONTENTS Settlement in Scotland during the Second Millennium BC P Ashmore Place and Space in the Cambridgeshire Bronze Age T Malim Exploring Bronze Age Norfolk Longham and Bittering T Ashwin Ritual Activity at the Foot of the Gog Magog Hills Cambridge M Hinman The Bronze Age of Manchester Airport Runway 2 D Garner Place and Memory in Bronze Age Wessex D Field Bronze Age Agricultural Intensification in the Thames Valley and Estuary D Yates The Community of Builders The Barleycroft Post Alignments C Evans and M Knight Breaking New Ground Land Tenure and Fieldstone Clearance during the Bronze Age R Johnston Tenure and Territoriality in the British Bronze Age A Question of Varying Social and Geographical Scales W Kitchen A Later Bronze Age Landscape on the Avon Levels Settlement Settlement Shelters and Saltmarsh at Cabot Park M Locock Reading Business Park The Results of Phases 1 and 2 A Brossler Leaving Home in the Cornish Bronze Age Insights into Planned Abandonment

Knight,2022-02-03 The destruction and deposition of metalwork is a widely recognised phenomenon across Bronze Age Europe Weapons were decommissioned and thrown into rivers axes were fragmented and piled in hoards and ornaments were crushed contorted and placed in certain landscapes Interpretation of this material is often considered in terms of whether such acts should be considered ritual offerings or functional acts for storing scrapping and recycling the metal This book approaches this debate from a fresh perspective by focusing on how the metalwork was destroyed and deposited as a means to understand the reasons behind the process To achieve this this study draws on experimental archaeology as well as developing a framework for assessing what can be considered deliberate destruction Understanding these processes not only helps us to recognise how destruction happened but also gives us insights into the individuals involved in these practices Through an examination of metalwork from south west Britain it is possible to observe the complexities involved at a localised level in the acts of destruction and deposition as well as how they were linked to people and places This case study is used to consider the social role of destruction and deposition more broadly in the Bronze Age highlighting how it transformed over time and space

Cliffs End Farm Isle of Thanet, Kent Jacqueline I. McKinley, Matt Leivers, Jörn Schuster, Peter Marshall, 2015-02-05 Excavations at Cliffs End Farm Thanet Kent undertaken in 2004 uncovered a dense area of archaeological remains including Bronze Age barrows and enclosures and a large prehistoric mortuary feature as well as a small early 6th to late 7th century Anglo Saxon inhumation cemetery An extraordinary series of human and animal remains were recovered from the Late Bronze Age Middle Iron Age mortuary feature revealing a wealth of evidence for mortuary rites including exposure excarnation and curation The site seems to have been largely abandoned in the later Iron Age and very little Romano British activity was identified In the early 6th century a small inhumation cemetery was established Very little human bone survived within the 21 graves where the burial environment differed from that within the prehistoric mortuary feature but grave goods indicate females and males were buried here Richly furnished graves included that of a female buried with a necklace a pair of brooches and a purse as well as a male with a shield covering his face a knife and spearhead In the Middle Saxon period lines of pits possibly delineating boundaries were dug some of which contained large deposits of marine shells English Heritage funded an extensive programme of radiocarbon and isotope analyses which have produced some surprising results that shed new light on long distance contacts mobility and mortuary rites during later prehistory This volume presents the results of the investigations together with the scientific analyses human bone artefact and environmental reports

European Societies in the Bronze Age A. F. Harding, 2000-05-18 The Bronze Age roughly 2500 to 750 BC was the last fully prehistoric period in Europe and a crucial element in the formation of the Europe that emerged into history in the later first millennium BC This book focuses on the material culture remains of the period and through them provides an interpretation of the main trends in human development that occurred during this timespan It pays particular attention to the discoveries and theoretical advances of the last twenty years that have necessitated a major revision of received opinions about many aspects of the Bronze Age Arranged thematically it reviews the evidence for a range of topics in cross cultural fashion defining which major characteristics of the period were universal and which culture and area specific The result is a comprehensive study that will be of value to specialists and students while remaining accessible to the non specialist
