The Philosophy Of Perception:

The Philosophy of Perception Geoffrey James Warnock, 1967

Philosophy of Perception William Fish, 2010-05-07

The philosophy of perception investigates the nature of our sensory experiences and their relation to reality. Raising questions about the conscious character of perceptual experiences, how they enable us to acquire knowledge of the world in which we live, and what exactly it is we are aware of when we hallucinate or dream, the philosophy of perception is a growing area of interest in metaphysics, epistemology, and philosophy of mind. William Fish's *Philosophy of Perception* introduces the subject thematically, setting out the major theories of perception together with their motivations and attendant problems. While providing historical background to debates in the field, this comprehensive overview focuses on recent presentations and defenses of the different theories and looks beyond visual perception to take into account the role of other senses. Topics covered include the phenomenal principle, perception and hallucination, perception and content, sense data, adverbialism, and idealism, disjunctivism, and relationalism, intentionalism, and combined theories, the nature of content, veridicality, perception and empirical science, non-visual perception. With summaries and suggested further reading at the end of each chapter, this is an ideal introduction to the philosophy of perception.

Purpose and Procedure in Philosophy of Perception Heather Logue, Louise Richardson, 2021. This volume presents a collection of chapters examining fundamental assumptions of contemporary debates in the philosophy of perception. The chapters cover a wide range of topics from the relation between scientific and philosophical theorizing about perception to lessons we can learn from the history of philosophy of perception.

Perception Barry Maund, 2014-12-18. The philosophical issues raised by perception make it one of the central topics in the philosophical tradition. Debate about the nature of perceptual knowledge and the objects of perception comprises a thread that runs through the history of philosophy. In some historical periods the major issues have been predominantly epistemological and related to scepticism, but an adequate understanding of perception is important more widely, especially for metaphysics and the philosophy of mind. For this reason, Barry Maund provides an account of the major issues in the philosophy of perception that highlights the importance of a good theory of perception in a range of philosophical fields, while also seeking to be sensitive to the historical dimension of the subject. The work presents chapters on forms of natural realism, theories of perceptual experience, representationalism, the argument from illusion, phenomenological senses, types of perceptual content, the representationalist/intentionalist thesis, and adverbialist accounts of perceptual experience. The ideas of, among others, Austin, Dretske, Heidegger, Millikan, Putnam, and Robinson are considered, and the reader is given a philosophical framework within which to consider the issues.

Vision and Mind Alva Noë, Evan Thompson, 2002-10-25. The philosophy of perception is a microcosm of the metaphysics of mind. Its central problems: What is perception? What is the nature of perceptual consciousness? How can one fit an account of perceptual experience into a broader account of the nature of the mind and the world? are at the heart of metaphysics. Rather than try to cover all of the many strands in the philosophy

of perception this book focuses on a particular orthodoxy about the nature of visual perception The central problem for visual science has been to explain how the brain bridges the gap between what is given to the visual system and what is actually experienced by the perceiver The orthodox view of perception is that it is a process whereby the brain or a dedicated subsystem of the brain builds up representations of relevant figures of the environment on the basis of information encoded by the sensory receptors Most adherents of the orthodox view also believe that for every conscious perceptual state of the subject there is a particular set of neurons whose activities are sufficient for the occurrence of that state Some of the essays in this book defend the orthodoxy most criticize it and some propose alternatives to it Many of the essays are classics Contributors G E M Anscombe Dana Ballard Daniel Dennett Fred Dretske Jerry Fodor H P Grice David Marr Maurice Merleau Ponty Zenon Pylyshyn Paul Snowdon and P F Strawson *Sensation and Perception* D. W. Hamlyn, 2022-09-01 First published in 1961 *Sensation and Perception* aims to cast light upon the nature of perception itself This the author believes can be achieved only through an understanding of the concepts of sensation and perception A survey of the principal attempts to arrive at such an understanding brings out the fact that perception has most often been assimilated to sensation or judgment The author believes that both of these views are wrong but that an attention to the history of thought can provide an explanation of the temptation to accept them A final chapter gives the author's own views on the nature of sensation and perception As such it would be of interest both to philosophers and to those psychologists who are concerned with the nature of perception **The Oxford Handbook of Philosophy of Perception** Mohan Matthen, 2015 The Oxford Handbook of the Philosophy of Perception is a survey by leading philosophical thinkers of contemporary issues and new thinking in philosophy of perception It includes sections on the history of the subject introductions to contemporary issues in the epistemology ontology and aesthetics of perception treatments of the individual sense modalities and of the things we perceive by means of them and a consideration of how perceptual information is integrated and consolidated New analytic tools and applications to other areas of philosophy are discussed in depth Each of the forty five entries is written by a leading expert some collaborating with younger figures each seeks to introduce the reader to a broad range of issues All contain new ideas on the topics covered together they demonstrate the vigour and innovative zeal of a young field The book is accessible to anybody who has an intellectual interest in issues concerning perception The Rationality of Perception Susanna Siegel, 2016-12-22 On a traditional conception of the human mind reasoning can be rational or irrational but perception cannot Perception is simply a source of new information and cannot be assessed for rationality or justification Susanna Siegel argues that this conception is wrong Drawing on examples involving racism emotion self defense law and scientific theories The Rationality of Perception makes the case that perception itself can be rational or irrational The Rationality of Perception argues that reasoning and perception are often deeply intertwined When unjustified beliefs fears desires or prejudices influence what we perceive we face a philosophical problem is it reasonable to strengthen what one believes fears or

suspects on the basis of an experience that was generated unbeknownst to the perceiver by those very same beliefs fears or suspicions Siegel argues that it is not reasonable even though it may seem that way to the perceiver In these cases a perceptual experience may itself be irrational because it is brought about by irrational influences Siegel systematically distinguishes a number of different kinds of influences on perception and builds a theory of how such influences on perception determine what it is rational or irrational to believe She uses the main conclusions to analyze perceptual manifestations of racism This book makes vivid the far reaching consequences of psychological and cultural influences on perception Its method shows how analytic philosophy social psychology history and politics can be mutually illuminating

The Philosophy of Perception Christoph Limbeck-Lilienau, Friedrich Stadler, 2019-07-22 In this volume the philosophy of perception and observation is discussed by leading philosophers with implications in the philosophy of mind in epistemology and in philosophy of science In the last years the philosophy of perception underwent substantial changes and new views appeared the intentionality of perception has been contested by relational theories of perception direct realism a richer view of perceptual content has emerged new theories of intentionality have been defended against naturalistic theories of representation e g phenomenal intentionality These theoretical changes reflect also new insights coming from psychological theories of perception These changes have substantial consequences for the epistemic role of perception and for its role in scientific observation In the present volume leading philosophers of perception discuss these new views and show their implications in the philosophy of mind in epistemology and in philosophy of science A special focus is laid on Franz Brentano and Ludwig Wittgenstein A reference volume for all scholars and students of the history psychology and philosophy of perception and cognitive science

The Philosophy of Perception Lambert Wiesing, 2014-08-28 Lambert Wiesing's *The Philosophy of Perception* challenges current theories of perception Instead of attempting to understand how a subject perceives the world Wiesing starts by taking perception to be real He then asks what this reality means for a subject In his original approach the question of how human perception is possible is displaced by questions about what perception obliges us to be and do He argues that perception requires us to be embodied to be visible and to continually participate in the public and physical world we perceive Only in looking at images he proposes can we achieve something like a break in participation a temporary respite from this one of perception's relentless demands Wiesing's methods chart a markedly new path in contemporary perception theory In addition to identifying common ground among diverse philosophical positions he identifies how his own phenomenological approach differs from those of many other philosophers past and present As part of the argument he provides a succinct but comprehensive survey of the philosophy of images His original critical exposition presents scholars of phenomenology perception and aesthetics with a new important understanding of the old phenomenon the human being in the world
