Philosophy of Sin Oswald Chambers, 1998 In this three in one volume Oswald Chambers the noted author of *My Utmost for His Highest* deals with Christian ethics morality and the anatomy of sin *Essays in the Philosophy of Religion* Philip L. Quinn, 2006-10-12 This volume presents a selection of essays by the late Philip Quinn one of the world's leading philosophers of religion Quinn left behind an influential body of work on a wide variety of topics He was the author of *Divine Commands and Moral Requirements* 1978 and of more than two hundred papers in philosophy Fourteen of his best and most influential contributions to the philosophy of religion are gathered here The papers have been organized around the following topics religious epistemology religious ethics religion and tragic dilemmas religion and political liberalism topics in Christian philosophy and religious diversity **The Philosophy of Kierkegaard** George Pattison, 2015-01-28 Although the ideas of Søren Kierkegaard played a pivotal role in the shaping of mainstream German philosophy and the history of French existentialism the question of how philosophers should read Kierkegaard is a difficult one to settle His intransigent religiosity has led some philosophers to view him as essentially a religious thinker of a singularly anti philosophical attitude who should be left to the theologians In this major new survey of Kierkegaard's thought George Pattison addresses this question head on and shows that although it would be difficult to claim a philosophy of Kierkegaard as one could a philosophy of Kant or of Hegel there are nevertheless significant points of common interest between Kierkegaard's central thinking and the questions that concern philosophers today The challenge of self knowledge in an age of moral and intellectual uncertainty that lies at the heart of Kierkegaard's writings remains as important today as it did in the culture of post Enlightenment modernity

The Philosophy of Peter Abelard John Marenbon, 1997 This book offers a major reassessment of the philosophy of Peter Abelard 1079-1142 which shows that he was a far more constructive and wider ranging thinker than has usually been supposed It combines detailed historical discussion based on published and manuscript sources with philosophical analysis which aims to make clear Abelard's central arguments about the nature of things language and the mind and about morality Although the book concentrates on these philosophical questions it places them within their theological and wider intellectual context
