The Political Economy of Digital Monopolies Bilić, Paško, Prug,

Toni, 2021-07-16 At a time when the practices of technology companies continue to attract fierce criticism this book asks what it actually means to hold a monopoly in the tech world and how it might affect the way in which an organization operates Combining new and traditional Marxian perspectives the authors offer an in depth analysis of how these technology giants are produced financialized and regulated As technology firms continue to shape our political and socio economic landscape this book will be an invaluable resource for scholars and students who seek to understand the function of technological monopolies in contemporary capitalism

The Political Economy of Asian Transition from Communism
Sujian Guo, 2017-11-28 A comparative study of the political economy of the transition from communism in East and Southeast Asian countries China North Korea Vietnam Laos and Cambodia addressing the key theoretical questions generated from the debate between shock therapists and gradualists While accurately defining the pre reform model this book explores the causal variables that have contributed to reform efforts within Asia examining the significance of the sequencing of political and economic transition and the interplay between politics and the economy in determining variations in transition outcomes Comparing the real world experiences of transition nations in communist Asia with Eastern Europe prominent questions are brought to the fore will market capitalism or market socialism prevail after the grand failure of communism This book makes an important contribution to the political economy theory of comparative communist and post communist studies and provides detailed analytical insights that will prove influential in future theoretical work

The Political Economy of
Competition Law in China Wendy Ng, 2018-01-11 The Political Economy of Competition Law in China provides a unique multifaceted perspective of China's anti monopoly law

The Political Economy of Pipelines Jeff D. Makhholm, 2022-12-22
With global demand for energy poised to increase by more than half in the next three decades the supply of safe reliable and reasonably priced gas and oil will continue to be of fundamental importance to modern economies Central to this supply are the pipelines that transport this energy And while the fundamental economics of the major pipeline networks are the same the differences in their ownership commercial development and operation can provide insight into the workings of market institutions in various nations Drawing on a century of the world's experience with gas and oil pipelines this book illustrates the importance of economics in explaining the evolution of pipeline politics in various countries It demonstrates that institutional differences influence ownership and regulation while rents and consumer pricing depend on the size and diversity of existing markets the depth of regulatory institutions and the historical structure of the pipeline businesses themselves The history of pipelines is also rife with social conflict and Makhholm explains how and when institutions in a variety of countries have controlled pipeline behavior either through economic regulation or government ownership in the

public interest The Political Economy of Change Warren Frederick Ilchman, Norman Thomas Uphoff, 1971 **The Political Economy of Distributism** Alexander William Salter, 2023-05-19

In recent years prominent scholars public intellectuals and politicians have advocated reforming America's economic model to embrace common good capitalism. Catholic social teaching is a major influence on this movement. Is common good capitalism compatible with the historical American commitments to private property rights and ordered liberty? What resources from Catholic social teaching can help orient free enterprise towards the common good? This book is the first scholarly inquiry into these exciting new questions. We can better understand common good capitalism by exploring the political economy of distributism. Formulated in the early 20th century by prominent Catholic intellectuals such as Hilaire Belloc and G. K. Chesterton, distributism emphasizes the importance of widely dispersed property ownership for human flourishing. Distributist thinkers opposed both to capitalism and socialism sought a humane approach to politics and economics that reflected the truths of Catholic social teaching. Some of the distributists' claims about markets and government must be revised in light of contemporary social science. Nevertheless, their political economic vision contains profound truths about the human condition which social scientists would be unwise to ignore. Distributism's insights about the nature of liberty and the social foundations of human dignity can improve ongoing conversations among economists, political scientists and philosophers. The Political Economy of Distributism explores distributism both as a research program and a blueprint for political economic reform. As many are reconsidering the relationship between markets and government, this timely book demonstrates the perennial relevance of the Catholic intellectual tradition to public affairs. Academics, public servants, policy experts and concerned citizens can all benefit from this timely study of common good capitalism's prospects.

The Political Economy of Innovation W. Kingston, 2012-12-06

Innovation is the turning of ideas into concrete realities. To the extent that this process is an economic one, it must also be subject to political decisions and these determine which ideas are to have resources made available for their innovation. This book attempts to trace the relationship between ideas, resources and politics. Chapter I deals with the way economic innovation depends both upon markets and upon interference with markets. Schumpeter taught us how market power is essential for innovation. This chapter stresses that the inverse is also true: Innovation can take place wherever there is market power. A most important corollary of this is that failure to develop any particular type of market power need not prevent innovation from happening. It will then take place under the protection of whatever market power there is and it will be geographically located wherever that market power is effective. Chapter II identifies and seeks to fill a major gap in the literature on innovation by showing how important modern marketing has become for providing the conditions under which money may be rationally invested at high risk to get new things done. Marketing monopoly or Persuasive market power is now at least as important as the market power of Capability or as the several types of Specific market power in interference with market forces. It is therefore equally important for innovation.
