The Place Of Reason In Education:

The Place of Reason in Education Bertram Bandman, 1967 **Education's Epistemology** Harvey Siegel, 2017-09-08
Education's Epistemology extends and further defends Harvey Siegel's reasons conception of critical thinking. It analyzes and emphasizes both the epistemic quality and the dispositions and character traits that constitute the critical spirit that are central to a proper account of critical thinking. Siegel argues that that epistemic quality must be understood ultimately in terms of epistemic rationality. Siegel defends a conception of rationality that involves both rules and judgment and argues that critical thinking has normative value over and above its instrumental tie to truth. Siegel also argues contrary to currently popular multiculturalist thought for both transcultural and universal philosophical ideals including those of multiculturalism and critical thinking themselves.

Educating Reason Harvey Siegel, 2013-09-27 First Published in 1988 The critical thinking movement is increasingly important in the philosophy of education. Beginning from the generally accepted view that children should be taught to reason not simply to repeat what they have been told, it tries to establish whether it is in fact possible to teach children a set of skills which add up to thinking. Siegel here examines three major conceptions of critical thinking and then puts forward his own definition of the critical thinker as one who is appropriately moved by reasons. He argues that critical thinking is a fundamental educational ideal and defends the ideal against charges of indoctrination. Chapters on science education and minimum competency testing highlight its practical implications for education policy and curriculum. This book should be of interest to lecturers and students of education and philosophy.

Higher Education in Liquid Modernity Marvin Oxenham, 2013-10-28 Based in sociologist Zygmunt Bauman's theory of liquid modernity, this volume describes and critiques key aspects and practices of liquid education: education as market-driven consumption, short life span of useful knowledge, overabundance of information through a systematic comparison with ancient Greek *paideia* and medieval university education, producing a sweeping analysis of the history and philosophy of education for the purpose of understanding current higher education, positing a more holistic alternative model in which students are embedded in a learning community that is itself embedded in a larger society. If liquid modernity has left a vacuum where, according to Bauman, the pilot's cabin is empty, this volume argues that no structure is better positioned to fill this vacuum than the university and outlines a renewed vision of social transformation through higher education.

Critical Reasoning in Contemporary Culture Richard A. Talaska, 1992-12-24 Here we have for the first time in a single volume diverse perspectives on the meaning, conditions and goals of critical reasoning in contemporary culture. Part One emphasizes critical reasoning and education, engaging the debate over the connection between critical reasoning skills and the learning of the content. Part Two offers analyses of the theoretical, methodological and historical debates concerning critical reasoning abilities. The authors represent a variety of disciplines and theoretical approaches which lend the book valuable intellectual pluralism. The book evaluates other aspects of critical thinking such as creativity, insight, questioning, learning, practical thought.

interpretation intellectual prejudice and the historical and temporary aspects of thought The Place of Information Technology in Management and Business Education Ben-Zion Barta, Peter Juliff, 1997-01-31 The power of modern information systems and information technology ISIIT offers new opportunities to rethink at the broadest levels existing business strategies approaches and practices Over the past decade IT has opened up new business opportunities led to the development of new strategic IS and challenged all managers and users of ISIIT to devise new ways to make better use of information Yet this era which began with much confidence and optimism is now suffering under a legacy of systems that are increasingly failing to meet business needs and lasting fixes are proving costly and difficult to implement General management is experiencing a crisis of confidence in their IS functions and in the chief information systems officers who lead them Earl and Feeney 1994 11 The concern for chief executive officers is that they are confronting a situation that is seemingly out of control They are asking What is the best way to rein in these problems and effectively assess IS performance Further how can we be certain that IS is adequately adding value to the organisational bottom line On the other hand IS executives and professionals who are responsible for creating managing and maintaining the organisation s systems are worried about the preparedness of general managers to cope with the growth in new technologies and systems They see IT having a polarising effect on general managers it either bedazzles or frightens them Davenport 1994 119 The "Reason" of Schooling Thomas Popkewitz, 2014-09-04 Problematizing the reason of schooling as historical and political in this book leading international and interdisciplinary scholars challenge the common sense of schooling and the relation of society education and curriculum studies Examining the limits of contemporary notions of power and schooling the argument is that the principles that order school subjects the curriculum and teaching reforms are historical practices that govern what is thought acted on and talked about Highlighting the dynamics of social exclusion the normalizing of people through curriculum and questions of social inclusion The Reason of Schooling underscores the urgency for rethinking curriculum research *Studies in the History of Educational Theory Vol 1 (RLE Edu H)* G Bantock, 2012-05-16 This book examines key theorists in depth in order to give some insight into cultural change as reflected in their curricular recommendations and in the interplay they reveal between the two fundamental educational concepts of artifice and nature The essays on the various theorists Erasmus Vives Castiglione Elyot Montaigne Bacon Comenius Locke and Rousseau can be read separately but the book also forms an integrated whole with a continuity of themes explored from theorist to theorist The book not only charts a historical development but also reveals much that may deepen our understanding of contemporary educational dilemmas The Educational magazine, and journal of Christian philanthropy, and of public utility [afterw.] The Educational magazine; and journal of scholastic literature [ed. by T.
