Politics and Planning in the Holy City Ira Sharkansky, 2017-07-28 Jerusalem is not just another city that illustrates the conflict between interests of professional planners and competing political perspectives It is the Holy City with a history of some 3 000 years Moreover numerous layers of historical remains have importance for intense and competitive religious and national interests Israelis claim it as the capital of their country and Palestinians want it or part of it as the capital of their not yet created state Jerusalem is also a place where more than 700 000 people live and the center of a metropolitan area with more than twice that number Along with religious and national interests there are the customary conflicts between what various groups property developers politicians professional planners neighborhood residents and environmental activists

want to do with the land Politics and Planning in the Holy City describes and analyzes the tensions between politics and planning The authors tackle the economic social and political contexts that shape conflicts Such problems include deciding what should be called Jerusalem and difficulties surrounding the construction of a defense barrier to protect Israelis from Palestinian terrorists in the framework of a multicultural city where 30 to 40 percent of its residents are Palestinians There is dissent over locating rail lines to the city as some interests want them here there or nowhere and over building a light rail line within a city already crowded and beset with conflicting interests The creation of a football stadium is another venue for conflict as many religious Jews view sports as a threat to their way of life Issues include locating a site for housing new immigrants as few Jerusalemites want large numbers of newcomers in their neighborhoods and deciding which sites merit preservation in a city with many deserving candidates but severely limited resources This volume will attract urban specialists as well as those concerned with larger p

The State and the City Ted Robert Gurr,Desmond King,1987-08-27 Many of the oldest and largest Western cities today are undergoing massive economic decline The State and the City deals with a key issue in the political economy of cities the role of the state Ted Robert Gurr and Desmond S King argue that theoreticians from both the left and the right have underestimated the significance of state action for cities Grounding theory in empirical evidence they argue that policies of the local and national state have a major impact on urban well being Gurr and King s analysis assumes modern states have their own interests institutional momentum and the capacity to act with relative autonomy Their historically based analysis begins with an account of the evolution of the Western state s interest in the viability of cities since the industrial revolution Their argument extends to the local level examining the nature of the local state and its autonomy from national political and economic forces Using cross national evidence Gurr and King examine specific problems of urban policy in the United States and Britain In the United States for example they show how the dramatic increases in federal assistance to cities in the 1930s and the

1960s were made in response to urban crises which simultaneously threatened national interests and offered opportunities for federal expansion of power. As a result, national and local states now play significant material and regulatory roles that can have as much impact on cities as all private economic activities. A comparative analysis of thirteen American cities reflects the range and impact of the state's activities at the urban level. Boston, they argue, has become the archetypical postindustrial public city: half of its population and personal income are directly dependent on government spending. While Gurr and King are careful to delineate the limits to the extent and effectiveness of state intervention, they conclude that these limits are much broader than formerly thought. Ultimately, their evidence suggests that the continued decline of most of the old industrial cities is the result of public decisions to allow their economic fate to be determined in the private sector.

"Can We All Get Along?" Paula D. McClain, Joseph Stewart Jr., 2013-07-16 In a nation built by immigrants and bedeviled by the history and legacy of slavery and discrimination, how do we as Americans reconcile a commitment to equality and freedom with persistent inequality and discrimination? And what can we do about it? This widely acclaimed text by Paula D. McClain, with new coauthor Jessica D. Johnson Carew, provides a comprehensive and accessible overview of the historical and contemporary political experience of the major groups: African Americans, Latinos, Asian Americans, and American Indians in the United States. It explores the similarities and differences in these groups' representation and participation in law, politics, and policymaking; discusses the enduring issues and concerns that they face; and examines intra- and inter-group competition and coalition building in the face of enduring conflict and inequality. The seventh edition has been thoroughly revised and updated to include coverage of President Barack Obama's second term, the 2016 election, police brutality, and Black Lives Matter, and the Dakota Access Pipeline protest movement. With a brand new chapter on the intersections of race and gender, *Can We All Get Along* remains unparalleled in its comparative coverage of the current landscape of minority politics in the United States.

Managing Urban America Robert E. England, John P. Pelissero, David R. Morgan, 2016-05-06 *Managing Urban America* guides students through the challenges, politics, and practice of urban management, including managing conflict, through politics; adapting to demographic and social changes; balancing budgets; and delivering a myriad of goods and services to citizens in an efficient, equitable, and responsive manner. The Eighth Edition has been thoroughly updated to include a discussion of the difficulties cities confront as they deal with the lingering economic challenges of the 2008 recession, the concept of e-government, and how it affects the theory and practice of management, and the implications of environmental issues for urban government management.

Debt Wish Alberta Sbragia, 1996-05-15 Albert Sbragia considers American urban government as an investor, whether for building infrastructure or supporting economic development. Over time, such investment has become disconnected from the normal political and administrative processes of local policymaking through the use of special public spending authorities like water and sewer commissions and port, turnpike, and public power authorities. Sbragia explores how this entrepreneurial activity developed and how federal and

state policies facilitated or limited it She also analyzes the implications of cities creating innovative special purpose quasi governments to circumvent and dilute state control over city finances diluting their own authority in the process
