Meadows, 1840 **An improved dictionary: English and French, and French and English** Edward Weller (of Bruges.), 1863 *Shipbuilders of the Venetian Arsenal* Robert C. Davis, 1991-02-01 Winner of the American Catholic Historical Association's Howard R. Marraro Prize in Italian History The master shipbuilders of seventeenth century Venice formed part of what was arguably the greatest manufacturing complex in early modern Europe As many as three thousand masters apprentices and laborers regularly worked in the city's enormous shipyards This is the social history of the men and women who helped maintain not only the city's dominion over the sea but also its stability and peace Drawing on a variety of documents that include nearly a thousand petitions from the shipbuilders to the Venetian governments as well as on parish records inventories and wills Robert C. Davis offers a vivid and compelling account of these early modern workers He explores their mentality and describes their private and public worlds which in some ways he argues prefigured the factories and company towns of a later era He uncovers the far reaching social and cultural role played by women in this industrial community He shows how the Venetian government formed its shipbuilders into a militia to maintain public order And he describes the often colorful

ways in which Venetians dealt with the tensions that role provoked including officially sanctioned community fistfights on the city's bridges The recent decision by the Italian government to return the Venetian Arsenal to civilian control has sparked renewed interest in the subject among historians Shipbuilders of the Venetian Arsenal offers new evidence on the ways in which large state run manufacturing operations furthered the industrialization process as well as on the extent of workers influence on the social dynamics of the early modern European city
