*Small Works* John A. Donaldson, 2011-08-15 How can policymakers effectively reduce poverty Most mainstream economists advocate promoting economic growth on the grounds that it generally reduces poverty while bringing other economic benefits However this dominant hypothesis offers few alternatives for economies that are unable to grow or in places where economic growth fails to reduce or actually exacerbates poverty In *Small Works* John A Donaldson draws on his extensive fieldwork in two Chinese provinces Yunnan and Guizhou that are exceptions to the purported relationship between economic growth and poverty reduction In Yunnan an outward oriented developmental state one that focuses on large scale urban development has largely failed to reduce poverty even though it succeeded in stimulating economic growth Provincial policy shaped roads tourism and mining in ways that often precluded participation by poor people By contrast Guizhou is a micro oriented state one that promotes small scale low skill economic opportunities and so reduces poverty despite slow economic growth It is no coincidence that this Guizhou approach parallels the ideas encapsulated in the scientific development view of China s current president Hu Jintao After all Hu when Guizhou s leader helped establish the micro oriented state in the province Donaldson s conclusions have implications for our understanding of development and poverty reduction economic change in China and the thinking behind China s policy decisions
