Small Enterprises and Adjustment Nii K. Sowa, 1992 **Small Enterprises and Adjustment** Nii Kwaku Sowa, 1992
Finance and Management of Small-Scale Seed Enterprises, Economic Reforms in Ghana Ernest Aryeetey, Jane Harrigan, Machiko Nissanke, 2000 Reviews the performance of the Ghanaian economy for the period 1983 to 1991 aimed at assessing the impact of structural adjustment policies in different areas of the economy Small Enterprises Under Adjustment in Ghana William F. Steel, Leila Webster, 1991 Ghana is often cited as an African country that has undertaken major macroeconomic reforms with generally positive results for economic growth Within Ghana's industrial sector the effects of structural adjustment policies have differed among subsectors and firms Little is known however about the impact of adjustment on smaller firms A survey of small scale enterprises SSEs was carried out in November 1989 to learn more about the impact of the adjustment program on their operations to evaluate their potential contribution to dynamic industrial recovery and to identify appropriate measures that would accelerate the growth of SSEs in numbers size and productivity Specific objectives of the survey were to 1 learn more about the characteristics of small firms and their owners 2 analyze how policy changes have affected small firms highlighting entrepreneurs strategies for adapting to their new environments and 3 identify constraints to the future growth of small firms Results show that adjustment policies have forced the SSEs to become more competitive to survive and that significant structural changes are taking place across subsectors and within firms The overall business environment has generally improved during the adjustment program although shortcomings remain Uncertainty about political and economic stability and lack of finance appear to be the most immediate restraints on investment **Adjustment in Africa** Ishrat Husain, Rashid Faruquee, 1994-01-01 World Bank Environment Paper 4 This survey describes the factors that affect tree cultivation and clearance by Kenyan farmers These factors include agricultural conditions product markets the family life cycle income and changing demands for household labor especially demands caused by labor migration The author explains why removing structural constraints on rural land markets might reduce the incentive to start and maintain woodlots He also details why policies that seek to create forests may conflict with programs that generate rural employment *Foreign Aid, Self-Reliance, and Economic Development in West Africa* R Omutay Olaniyan, 1996-08-30 This book is a penetrating comparative analysis of the economic development efforts of West African countries It seeks to illuminate the grey areas in development and to emphasize the appropriate actions that should be taken at all levels in the emerging international economy to ensure sustainable development Olaniyan examines conceptual and theoretical problems of foreign aid and economic development along with the limitations of the concept of self reliance The book also features a comparative analysis of the internal and external development problems associated with West African countries including difficulties of collective self reliance at the subregional level Olaniyan concludes that there are prospects for sustainable development in the area especially if it is internally generated **Training for Work in the Informal**

Micro-Enterprise Sector Hans Christiaan Haan,2006-10-04 In Sub Sahara Africa the sector of informal micro enterprises IMEs is already employing a large share of the labour force in both urban and rural areas This study reviews the ways in which the owners and workers of IMEs have acquired their vocational and management skills It reviews the contributions of all the different training providers including public sector training institutes private sector training providers and training centres run by NGOs and other non profit organizations The study finds that informal apprenticeship training is by far the most common source of various skills in some countries it is likely to be responsible for 80 90% of all ongoing training efforts Informal apprenticeship training presents a number of important advantages At the same time it has a number of limitations The study concludes that there is a major challenge to improve the transfer of relevant skills to IME operators both through pre employment training and skills upgrading In view of the scope of the challenge to provide hundreds of thousands IME owners and workers as well as large numbers of out of school youths with relevant practical and management skills it suggests to build upon the strengths of the existing practices of informal apprenticeship training and to remedy its weaknesses by involving professional training providers in upgrading its training organization and delivery quality and efficiency and final training outcomes It reviews the results of a number of innovative interventions in different African countries that are working in this direction Finally the study suggests that there is an interesting potential in business embedded training provided by private companies as part of their regular business operations Routledge Handbook of Entrepreneurship in Developing Economies Colin C. Williams,Anjula Gurtoo,2016-07-22 The Routledge Handbook of Entrepreneurship in Developing Economies is a landmark volume that offers a uniquely comprehensive overview of entrepreneurship in developing countries Addressing the multi faceted nature of entrepreneurship chapters explore a vast range of subject areas including education economic policy gender and the prevalence and nature of informal sector entrepreneurship In order to understand the process of new venture creation in developing economies what it means to be engaged in entrepreneurship in a developing world context must be addressed This handbook does so by exploring the difficulties risks and rewards associated with being an entrepreneur and evaluates the impacts of the environment relationships performance and policy dynamics on small and entrepreneurial firms in developing economies The handbook brings together a unique collection of over forty international researchers who are all actively engaged in studying entrepreneurship in a developing world context The chapters offer concise but detailed perspectives and explanations on key aspects of the subject across a diverse array of developing economies spanning Africa Asia Latin America and Eastern Europe In doing so the chapters highlight the heterogeneity of entrepreneurship in developed economies and contribute to the on going policy discourses for managing and promoting entrepreneurial growth in the developing world The book will be of great interest to scholars students and policymakers in the areas of development economics business and management public policy and development studies **Failing to Compete** Sanjaya Lall,Carlo Pietrobello,2002 Despite years of

liberalization African manufacturing is conspicuously unable to compete in the global market Its exports are minuscule its response to competition is weak technical efficiency is low and there are few signs of technological dynamism
