This is the third edition of the book, much expanded to include and incorporate important developments in the subject over the last fifteen years. The book represents a comprehensive treatise on all aspects of the bainite transformation, from the choreography of atoms during the phase change to length scales that are typical of engineering applications. The alloy design that emerges from this explains the role of solute additions and the pernicious effects of impurities such as hydrogen. The picture presented is self-consistent and therefore is able to guide the reader on the exploitation of theory to the design of some of the most exciting steels, including the world's first bulk nanostructured metal. **Digital Factory** Luka Kozamernik, 2024-03-31

The Digital Factory is a comprehensive guide for leaders in the manufacturing sector looking to navigate the complex digital transformation landscape. Digitalization has become crucial to any company's success in today's fast-paced business world. However, making sense of the plethora of information on approaching digitalization can be challenging, leaving many leaders needing clarification. The pressure to make the right decisions can be overwhelming, with various groups advocating their interests. Without a clear vision and understanding of digital transformation, leaders may lack confidence in making the right company decisions. And with access to specific and valuable knowledge about digital transformation, achieving optimal returns for the company can be more accessible. This book is designed to empower leaders in the manufacturing sector to overcome these challenges. Recent Trends in Algebraic Development Techniques Andrea Corradini, Ugo Montanari, 2009-08-29

This book constitutes the thoroughly refereed post-conference proceedings of the 19th International Workshop on Recent Trends in Algebraic Development Techniques (WADT 2008) held in Pisa, Italy, on June 13-16, 2008. The 18 revised full papers presented together with 3 invited talks were carefully reviewed and selected from 33 presentations at the workshop. The papers focus on the algebraic approaches to the specification and development of systems and address topics such as formal methods for system development, specification languages, and methods, systems, and

techniques for reasoning about specifications specification development systems methods and techniques for concurrent distributed and mobile systems and algebraic and co algebraic foundations
