The Middle Ages William James Ashley, 1909 A Test of the Economic Base Hypothesis in the Small Forest Communities of Southeast Alaska Guy C. Robertson, 2003 Recent harvest declines in the Western United States have focused attention on the question of economic impacts at the community level The impact of changing timber related economic activity in a given community on other local activity and the general economic health of the community at large has been a persistent and often contentious issue in debates surrounding forest policy decisions The economic base hypothesis in which changes in local export related economic activity are assumed to cause changes in economic activity serving local demand is a common framework for understanding impacts of forest policy decisions and forms the basis of models commonly used to provide estimates of expected local impacts under different policy options This study uses community specific time series employment data to test the economic base hypothesis in the small semi isolated communities of southeast Alaska Estimates were derived for each of 15 communities Export related activity was not found to cause changes in economic activity serving local demand for the average community However the results indicated statistically significant differences among communities in their response to shocks in export related activity The implications of these results for policy and for the theory and practice of modeling economic impacts at small spatial scales are explored in the final sections of this study Specifically secondary economic impacts cannot be taken as a foregone conclusion in policy analysis and the fundamental assumptions of static impact modeling approaches deserve greater scrutiny The Water Supply of Towns and the Construction of Water Works William Kinnimond Burton, 1898 **Hearing Before a Subcommittee...** United States. that the fearful clergy had taken into the cloister as their own serfs Williams weaves a tight net of historical circumstances iconographic traditions exegetical implications political motivations and liturgical functions to explain the imagery in the windows of the trades Her account of changing social relationships in thirteenth century Chartres focuses on the bakers tavern keepers and money changers whose bread wine and money were used as means of exchange tithing and offering throughout medieval society Drawing on a wide variety of original documents and scholarly work this book makes important new contributions to our knowledge of one of the great monuments of Western culture **the publishers weekly** ,1875
