Smart Schools From Training Memories To Education Minds:

Smart Schools David Perkins, 2008-06-30 Perkins reveals the common misguided strategies students use and offers teachers and parents advice on how they can help their children. Although there has been a great deal of impassioned debate over the sad state of American education today, surprisingly little attention has been paid to how children actually learn to think. But as David Perkins demonstrates, we cannot solve our problems in this area simply by redistributing power or by asking children to regurgitate facts on a multiple choice exam. Rather, we must ask what kinds of knowledge students typically acquire in school. In *Smart Schools*, Perkins draws on over twenty years of research to reveal the common misguided strategies students use in trying to understand a topic and then shows teachers and parents what strategies they can use with children to increase real understanding.

Science Education at the Nexus of Theory and Practice, 2008-01-01 This book is a compilation of papers from the inaugural International Science Education Conference held at the National Institute of Education, Singapore. The title *Science Education at the Nexus of Theory and Practice* reflects a pressing yet ongoing concern worldwide to integrate theory and practice in science education, and the reader will find something of interest to both science education practitioners and researchers. The editors have decided to engage in written dialogue before each of the three sections to enrich the experience. Divided into three key sections: A. Concepts, conceptual change, and science learning; B. science teacher development and learning; and C. access to science, accessible science, the 19 chapters will engender food for thought and in all likelihood transform classroom practices. All the contributors here provide important insights into the diverse education systems, cultural backgrounds, and societal norms through which science education can be realized.

Cultivating Curious and Creative Minds Cheryl J. Craig, Louise F. Deretchin, 2010-01-16 *Cultivating Curious and Creative Minds* presents a plethora of approaches to developing human potential in areas not conventionally addressed. Organized in two parts, this international collection of essays provides viable educational alternatives to those currently holding sway in an era of high stakes accountability. Taken together, the chapters in Part I of *Cultivating Curious and Creative Minds* provide a sampling of what the cultivation of curious and creative minds entails. The contributing authors shed light on how curiosity and creativity can be approached in the teaching domain and discuss specific ideas concerning how it plays out in particular situations and contexts.

Education and Mind in the Knowledge Age Carl Bereiter, 2005-04-11 In this book, Carl Bereiter, a distinguished and well-known cognitive educational psychologist, presents what he calls a new way of thinking about knowledge and the mind. He argues that in today's Knowledge Age, education's conceptual tools are inadequate to address the pressing educational challenges and opportunities of the times. Two things are required: first, to replace the mind as container metaphor with one that envisions a mind capable of sustaining knowledgeable intelligent behavior without actually containing stored beliefs; second, to recognize a fundamental difference between knowledge building and learning, both of which are essential parts of education for the knowledge age. Connectionism in cognitive science addresses the first

need certain developments in post positivist epistemology address the second The author explores both the theoretical bases and the practical educational implications of this radical change in viewpoint The book draws on current new ways of thinking about knowledge and mind including information processing cognitive psychology situated cognition constructivism social constructivism and connectionism but does not adhere strictly to any camp Above all the author is concerned with developing a way of thinking about the mind that can usher education into the knowledge age This book is intended as a starting point

Learning and Leading with Habits of Mind Bena Kallick, 2008-12-15 In Learning and Leading with Habits of Mind noted educators Arthur L Costa and Bena Kallick present a comprehensive guide to shaping schools around Habits of Mind The habits are a repertoire of behaviors that help both students and teachers successfully navigate the various challenges and problems they encounter in the classroom and in everyday life The Habits of Mind include Persisting Managing impulsivity Listening with understanding and empathy Thinking flexibly Thinking about thinking metacognition Striving for accuracy Questioning and posing problems Applying past knowledge to new situations Thinking and communicating with clarity and precision Gathering data through all senses Creating imagining innovating Responding with wonderment and awe Taking responsible risks Finding humor Thinking interdependently Remaining open to continuous learning This volume brings together in a revised and expanded format concepts from the four books in Costa and Kallick's earlier work Habits of Mind A Developmental Series Along with other highly respected scholars and practitioners the authors explain how the 16 Habits of Mind dovetail with up to date concepts of what constitutes intelligence present instructional strategies for activating the habits and creating a thought full classroom environment offer assessment and reporting strategies that incorporate the habits and provide real life examples of how communities school districts building administrators and teachers can integrate the habits into their school culture Drawing upon their research and work over many years in many countries Costa and Kallick present a compelling rationale for using the Habits of Mind as a foundation for leading teaching learning and living well in a complex world

Developing More Curious Minds John Barell, 2003-02-15 After the September 11 attacks on the World Trade Center and Pentagon many people questioned why no one had anticipated the terrorists acts even when events and intelligence seemed to point toward them John Barell wonders if the attacks speak to a greater societal problem of complacency He believes many students have become too passive in their learning accepting information and facts as presented in textbooks classes and the media Drawing on anecdotes from educators and his own life Barell describes practical strategies to spur students ability and willingness to pose and answer their own questions Antarctica expeditions outer space discoveries dinosaur fossils literature and more help define the importance of developing an inquisitive mind using such practices as Maintaining journals on field trips Using questioning frames and models when reading texts Engaging in critical thinking and problem based learning and Integrating inquiry into curriculum development and the classroom culture To become habits of mind students daily curiosities must be nurtured and
