Genevieve Baudoin, 2015-04-17 *Interpreting Site* explains the basic methods architects use to translate what you perceive to represent the complex conditions that physically and mentally construe a site helping to shape the ultimate design. Within each of the four themes defining site: experiencing site, spatializing site, and systematizing site, theoretical, conceptual, and analytic methods and representational tools are introduced to give you a foundation to develop your own approach to the conditions of a site. Author Genevieve S. Baudoin examines longstanding representation methods in relation to emerging and experimental methods, offering an idiosyncratic and provocative look at different approaches. Four highly illustrated, full-colour case studies of key contemporary projects in Spain, the United States, the United Kingdom, and Norway demonstrate how architects have used conditions discovered on a site in their final design. **The Architecture Traveler** Sydney LeBlanc, 2000. Describes 250 architectural treasures of the 20th century, gives notes on their history and design, and provides practical information for visiting them, with addresses, phone numbers, visitor hours, and maps. Each entry includes a black and white photo. LeBlanc is a writer and editor who specializes in architecture and landscape design. Annotation copyrighted by Book News, Inc. Portland, OR.
