Smoke Rings 1923:

The Origins of Transmedia Storytelling in Early Twentieth Century Adaptation Alexis Weedon, 2021-06-18 This book explores the significance of professional writers and their role in developing British storytelling in the 1920s and 1930s and their influence on the poetics of today's transmedia storytelling. Modern techniques can be traced back to the early twentieth century when film, radio, and television provided professional writers with new formats and revenue streams for their fiction. The book explores the contribution of four British authors, household names in their day who adapted work for film, television, and radio. Although celebrities between the wars, Clemence Dane, G. B. Stern, Hugh Walpole, and A. E. W. Mason have fallen from view. The popular playwright Dane, witty novelist Stern, and raconteur Walpole have been marginalised for being German Jewish, female, or gay, and Mason's contribution to film has been overlooked also. It argues that these and other vocational authors should be reassessed for their contribution to new media forms of storytelling. The book makes a significant contribution in the fields of media studies, adaptation studies, and the literary middlebrow. **Community Bookshelf**

Stephanie Zarach, 1987-06-18 **Pioneering Ideas for the Physical and Chemical Sciences** W. Fleischhacker, T. Schönfeld, 2013-11-11 This volume presents the contributions delivered at the Josef Loschmidt Symposium which took place in Vienna June 25-27 1995. The symposium was arranged to honor Josef Loschmidt one hundred years after his death 8 July 1895 to evaluate the significance of his contributions to chemistry and physics from a modern point of view and to trace the development of scientific fields in which he had done pioneering work. Loschmidt is widely known for the first calculation of the size of molecules 1865-66 which also led to values for the number of molecules in unit gas volume and for the mass of molecules. With critical analyses of problems in statistical physics he made important contributions to the development of that field. Loschmidt's paradoxon continues to be a point of departure for present-day studies and discussions. For decades there was little awareness that Loschmidt was a pioneer in organic structural chemistry. Only in recent years has Loschmidt's first scientific publication *Chemische Studien I* published in 1861 become more widely known and it is now recognized that with his ideas on the structure of organic molecules he was greatly ahead of the chemists of that time. The papers in these proceedings are arranged in three sections: 1 Organic structural chemistry Chapters 1-12 2 Physics and physical chemistry

Chapters 13 26 3 Loschmidt s biography Loschmidt s world Chapters 27 33 *The New Cambridge Bibliography of English Literature: Volume 4, 1900-1950* George Watson,I. R. Willison,1972-12-07 More than fifty specialists have contributed to this new edition of volume 4 of The Cambridge Bibliography of English Literature The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis articulation and coordination that it has been retained in all its essentials for the new edition The task of the new contributors has been to revise and integrate the lists of 1940 and 1957 to add materials of the following decade to correct and refine the bibliographical details already available and to re shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries

Proctor,2012-02-28 The cigarette is the deadliest artifact in the history of human civilization It is also one of the most beguiling thanks to more than a century of manipulation at the hands of tobacco industry chemists In *Golden Holocaust* Robert N Proctor draws on reams of formerly secret industry documents to explore

how the cigarette came to be the most widely used drug on the planet with six trillion sticks sold per year He paints a harrowing picture of tobacco manufacturers conspiring to block the recognition of tobacco cancer hazards even as they ensnare legions of scientists and politicians in a web of denial Proctor tells heretofore untold stories of fraud and subterfuge and he makes the strongest case to date for a simple yet ambitious remedy a ban on the manufacture and sale of cigarettes
