Trimpi,Nathaniel B. Cohen,1955 The nonlinear characteristic differential equations applicable to a quasi one dimensional unsteady channel flow with friction and heat transfer are linearized and integrated in functional form for the particular study of small perturbations from ideal shock tube flows If the equivalence of unsteady and steady flow boundary layers is assumed the problem of determining the perturbation in the unsteady flow reduces to an evaluation of the drag of a flat plate in the equivalent steady flow Journal of the Royal Aeronautical Society ,1915 **Proceedings of the National Symposium on Winds for Aerospace Vehicle Design**

The Chemical Warfare Service: From Laboratory to Field, 2010, *,2011 The Chemical Warfare Service Leo P. Brophy,Wyndham D. Miles,Rexmond Canning Cochrane,2010 This volume the second in a series of three devoted to the Chemical Warfare Service CWS in World War II now the Chemical Corps covers research development procurement and distribution of chemical warfare materiel It traces the history of these activities from the World War I period when the CWS was activated to supervise the offensive and defensive aspects of gas warfare throughout the Army until the end of World War II The first volume in the series Organizing for War discusses the development of the CWS organization and mission as well as personnel management and military training The third volume entitled Chemicals in Combat will deal with the chemical warfare activities in the theaters of operations In treating research and development the present volume concentrates on CWS projects that proved of greatest significance to the armed forces during World War II It attempts to point up the problems that arose in course of research and development and to indicate the solutions which the scientists hit upon Since research and development in the zone of the interior was closely related to research and development in the theaters of operations the volume covers activities in both areas In contrast to research and development procurement and distribution differed considerably as between the zone of the interior and the theaters of operations in the theaters these activities were closely associated with the commanders combat responsibilities The volume therefore confines itself to a review of procurement and distribution in the zone of the interior leaving narration of theater activities to the volume Chemicals in combat *The Chemical Warfare Service: The chemical warfare service; from laboratory to field* ,1959
Propellants and Explosives Naminosuke Kubota,2015-04-22 Propellants and Explosives Explosives and propellants are

termed energetic materials for containing considerable chemical energy which can be converted into rapid expansion In contrast to simple burning of a fuel explosives and propellants are self contained and do not need external supply of oxygen via air Since their energy content thus inherently creates the risk of accidental triggering of the explosive reaction proper synthesis formulation and handling during production and use are of utmost importance for safety and necessitate specialist knowledge on energetic materials their characteristics handling and applications Now in its third edition the classic on the thermochemical aspects of the combustion of propellants and explosives is completely revised and updated and includes green propellants as new topic The combustion processes of typical energetic crystalline and polymeric materials and various types of propellants and pyrolants are presented to provide an informative generalized approach for the understanding of the combustion mechanisms of those materials The first half of the book represents an introductory text on pyrodynamics describing fundamental aspects of the combustion of energetic materials The second half highlights applications of energetic materials as propellants explosives and pyrolants with focus on phenomena occurring in rocket motors In addition the appendix gives a brief overview of the fundamentals of aerodynamics and heat transfer which is a prerequisite for the study of pyrodynamics A detailed reference for readers interested in rocketry or explosives technology **Rocket Propulsion**

Elements George P. Sutton, Oscar Biblarz, 2011-09-09 The definitive text on rocket propulsion now revised to reflect advancements in the field For sixty years Sutton's Rocket Propulsion Elements has been regarded as the single most authoritative sourcebook on rocket propulsion technology As with the previous edition coauthored with Oscar Biblarz the Eighth Edition of Rocket Propulsion Elements offers a thorough introduction to basic principles of rocket propulsion for guided missiles space flight or satellite flight It describes the physical mechanisms and designs for various types of rockets and provides an understanding of how rocket propulsion is applied to flying vehicles Updated and strengthened throughout the Eighth Edition explores The fundamentals of rocket propulsion its essential technologies and its key design rationale The various types of rocket propulsion systems physical phenomena and essential relationships The latest advances in the field such as changes in materials systems design propellants applications and manufacturing technologies with a separate new chapter devoted to turbopumps Liquid propellant rocket engines and solid propellant rocket motors the two most prevalent of the rocket propulsion systems with in depth consideration of advances in hybrid rockets and electrical space propulsion Comprehensive and coherently organized this seminal text guides readers evenhandedly through the complex factors that shape rocket propulsion with both theory and practical design considerations Professional engineers in the aerospace and defense industries as well as students in mechanical and aerospace engineering will find this updated classic indispensable for its scope of coverage and utility **Journal of Research** United States.
