**Coal Review**, 1920

Make/Believing the World(s) Mark S. McLeod-Harrison, 2009-11-10 A vigorous defence of a radical ontological pluralism that requires theism and is consistent with traditional Christianity

The Value of Rationality Ralph Wedgwood, 2017 Ralph Wedgwood gives a general account of the concept of rationality The Value of Rationality is designed as the first instalment of a trilogy to be followed by accounts of the requirements of rationality that apply specifically to beliefs and choices The central claim of the book is that rationality is a normative concept This claim is defended against some recent objections Normative concepts are to be explained in terms of values not in terms of ought or reasons Rationality is itself a value rational thinking is in a certain way better than irrational thinking Specifically rationality is an internalist concept what it is rational for you to think now depends solely on what is now present in your mind Nonetheless rationality has an external goal the goal of thinking correctly or getting things right in one's thinking The connection between thinking rationally and thinking correctly is probabilistic if your thinking is irrational that is in effect bad news about your thinking's degree of correctness This account of rationality explains how we should set about giving a theory of what it is for beliefs and choices to be rational Wedgwood thus unifies practical and theoretical rationality and reveals the connections between formal accounts of rationality such as those of formal epistemologists and decision theorists and the more metaethics inspired recent discussions of the normativity of rationality He does so partly by drawing on recent work in the semantics of normative and modal terms including deontic modals like ought

**Life** John Ames Mitchell, 1928

**Deadly Worlds** Charles C. Lemert, Anthony Elliott, 2006 Deadly Worlds offers an original analysis of one of the unsolved questions of the current age what are the emotional costs and possibilities of globalization Lemert and Elliott challenge the dominant interpretations of the late modern world by delving below the surface of cultural and economic theories to explore theories of the new individualism Against European ideas that the individual is either a manipulated artifact of mass culture or a reflexive self facing global risks they pose the possibility that the new worlds are actually deadly Against the American tradition of viewing the individual as having abandoned her moral center they suggest the necessity of rediscovered aggression as a proper moral quality Deadly Worlds is controversial but also plain spoken and intriguing It dares to rework the case method by telling the stories of real individuals Kelly struggling to find herself by plastic surgery

Norman responding to a positive HIV status by remaking his community Larry desperately seeking to control the world's demands by therapy Phyllis using her natural gift for aggression to heal and build institutions The life stories root the book's themes in worlds all can recognize while the presentation of the prevailing theories of globalization and its effects expand the reader's social imagination to new possibilities
