In-Between: Architectural Drawing and Imaginative Knowledge in Islamic and Western Traditions Hooman Koliji, 2016-03-09 Contemporary technical architectural drawings in establishing a direct relationship between the drawing and its object tend to privilege the visible physical world at the expense of the invisible intangible ideas and concepts including that of the designer's imagination As a result drawing may become a utilitarian tool for documentation devoid of any meaningful value in terms of a kind of knowledge that could potentially link the visible and invisible This book argues that design drawings should be recognized as intermediaries mediating between the world of ideas and the world of things spanning the intangible and tangible The notion of the Imaginal as an intermediary between the invisible and visible is discussed showing how architectural drawings lend themselves to this notion by performing as creative agents contributing not only to the physical world but also penetrating the realm of concepts The book argues that this in between quality to architectural drawing is essential and that it is critical to perceive drawings as subtle bodies that hold physical attributes for example form proportion color highly evocative yet with no matter Focusing on Islamic geometric architectural drawings both historical and contemporary it draws on key philosophical and conceptual notions of imagination from the Islamic tradition as these relate to the creative act In doing so this book not only makes important insights into the design process and act of architectural representation but more broadly it adds to debates on philosophies of the imagination linking both Western and Islamic traditions

Encyclopedia of Islamic Civilisation and Religion Ian Richard Netton, 2013-12-19 The Encyclopedia of Islamic Civilization and Religion provides scholarly coverage of the religion culture and history of the Islamic world at a time when that world is undergoing considerable change and is a focus of international study and debate The non Muslim world's perceptions of Islam have often tended to be dominated by unrepresentative radical extremist movements and media interpretations of events involving such movements to the extent that many people

are unaware of the depth and variety of Islamic thought At the same time many who have had a formal training in Islamic studies have tended to concentrate on the traditional to the exclusion of the contemporary The Encyclopedia of Islamic Civilization and Religion covers the full range of Islamic thought in historical depth but it also provides substantial coverage of contemporary trends across the Muslim world With well over a thousand entries on Islamic theology history arts science law and institutions and coverage of Islam in individual countries and cities around the world the Encyclopedia of Islamic Civilization and Religion provides an extremely rich resource for students and researchers in religious studies and Middle Eastern studies Entries are cross referenced and bibliographies are provided There is a full index Routledge published The Qura n An Encyclopedia in 2005 an excellent companion to the Encyclopedia of Islamic Civilization and Religion
