Temporal Man The Meaning And Uses Of Social Time:

Temporal man Robert H. Lauer, 1981 **Temporal Structures in Individual Time Management: Practices to Enhance Calendar Tool Design** Wu, Dezhi, 2009-08-31 This book covers the latest concepts methodologies techniques tools and perspectives essential to understanding individual time management experiences Provided by publisher *The Sociology of Time* Jiří Šubrt, 2021-10-26 In a critical comparative study of the sociological literature this book explores the term time and the various interconnections between time and a broad cluster of topics that create a conceptual labyrinth Various understandings of time manifest themselves in the context of many individual social problems there is no single vision in sociology of how to grasp time and address within social theory This book therefore attempts to define an approach to the concept of time and its associated terms duration temporality acceleration compression temporal structures change historical consciousness and others The volume is guided by a critical engagement with three main questions a the formation of human understanding of time b the functioning of temporal structures at different levels of social reality c the role and place of time in general sociological theory Explaining Social Processes Jiří Šubrt, Alemayehu Kumsa, Massimiliano Ruzzeddu, 2020-08-18 This textbook considers understanding social processes to be the main task of sociology From this perspective its authors demonstrate and explain problems which they consider to be crucial for contemporary social science These are topics of a theoretical and epistemological nature which are nevertheless closely connected with social development and issues arising from it The book moves from the more general theoretical questions and dilemmas raised by key social thinkers such as those connected with the concepts of actor agency institutions structures and systems It then leads to theoretical reflections on long term developmental processes associated with the phenomena of power and life in current societies including globalization identities migration etc It provides a comprehensive approach to the essential questions of sociology Lucidly written and including the latest sociological perspectives this book will find wide appeal among social science students and researchers and is also for the socially aware general reader , **High-speed Society** Hartmut Rosa, 2010-11-01 Everywhere life seems to be speeding up we talk of fast food and speed dating But what does the phenomenon of social acceleration really entail and how new is it While much has been written about our high speed society in the popular media serious academic analysis has lagged behind and what literature there is comes more from Europe than from America This collection of essays is a first step toward exposing readers on this side of the Atlantic to the importance of this phenomenon and toward developing some preliminary conceptual categories for better understanding it Among the major questions the volume addresses are these Is acceleration occurring across all sectors of society and all dimensions of life or is it affecting some more than others Where is life not speeding up and what results from this disparity What are the fundamental causes of acceleration as well as its consequences for everyday experience How does it affect our political and legal institutions How much speed can we tolerate The volume tackles these questions in three sections Part 1 offers a

selection of astute early analyses of acceleration as experienced in the late nineteenth and early twentieth centuries Part 2 samples recent attempts at analyzing social acceleration including translations of the work of leading European thinkers Part 3 explores acceleration's political implications **The Promise of Hermeneutics** Roger Lundin, Anthony C.

Thiselton, Clarence Walhout, 1999 This work presents an engaging interdisciplinary study of the nature and scope of interpretation one of the most important areas of inquiry in today's postmodern world The three authors all acknowledged experts in the field bring the resources of the Bible Christian tradition and intellectual history to bear upon contemporary hermeneutical disputes Representing a complete revision of *The Responsibility of Hermeneutics* 1985 this substantially expanded volume has been brought up to date with recent work in hermeneutics and sets forth an important new perspective that shifts the interpretive focus from the past to the promise of the future Making use of the best insights from current theories about language interpretation and the nature of the self *The Promise of Hermeneutics* demonstrates how an encounter with contemporary interpretive theory can deepen the church's own hermeneutical practices The authors also show how the Christian faith can help move us beyond the many impasses created by postmodern thought ECSCW 2003

Kari Kuutti, Eija Helena Karsten, G. Fitzpatrick, Paul Dourish, K. Schmidt, 2003-08-31 These proceedings contain a collection of papers that encompass activities in the field These include papers addressing new interaction technologies for CSCW systems new models and architectures for groupware systems studies of communication and coordination among mobile actors studies of groupware systems in use in real world settings and theories and techniques to support the development of cooperative applications The papers present emerging technologies alongside new methods and approaches to the development of this important class of applications The work in this volume represents the best of the current research and practice within CSCW The collection of papers presented here will appeal to both researchers and practitioners alike as they combine an understanding of the nature of work with the possibilities offered by new technologies Illness Narratives in

Practice: Potentials and Challenges of Using Narratives in Health-related Contexts Gabriele Lucius-Hoene, Christine Holmberg, Thorsten Meyer, 2018-10-04 What is it like to live with an illness How do diagnostic procedures treatments and other encounters with medical institutions affect a patient's private and social life By asking these types of questions illness narratives have gained a reputation as a scientific domain in medicine in the last thirty years Today a patient's story plays an important role in doctor patient communication and the development of a healing relationship However whereas patient experiences have been well acknowledged methodologically reflected upon and widely collected as research data less consideration has been invested in exploring how they work in practice Used in the context of diagnosis treatment and teaching patient stories give us a new perspective on how healthcare could be improved *Illness Narratives in Practice Potentials and Challenges of Using Narratives in Health related Contexts* highlights the problems challenges and opportunities we face when using patient perspectives in practice and research in a clear format to provide readers with a

comprehensive overview of this field It investigates the epistemological foundations and communicational properties of illness narratives as well as the pragmatic effects of using them as clinical and educational instruments Significantly it presents new examples from patient intakes and interviews that illustrate the disparity in communication between patients and medical professionals The studies in this book also evaluate the experiences of medical practitioners and students who consciously use patient narratives as a tool for improved communication and diagnosis Divided into eight sections with practical examples for medical teaching and practice this book covers the use of patient narratives in communication training and decision making across medicine and psychotherapy In addition it reflects on the ethical aspects of working with a patient s personal experience of their illness reports on cultural differences across the globe and analyses how patients stories are used in politics and the media Written by scholars from multiple disciplines across clinical and theoretical fields this rich resource provides a critical stance on the use of narratives in medical research education and practice The Hermeneutics of Doctrine Anthony C. Thiselton, 2007-11-08 Throughout the book Thiselton shows how perspectives that arise from hermeneutics shed fresh light on theological method reshape horizons of understanding and reveal the relevance of doctrine for formation and for life **God and History in the Book of Revelation** Michael Gilbertson, 2003-07-24 This is an interdisciplinary study which constructs a dialogue between biblical interpretation and systematic theology It examines how far a reading of the Book of Revelation might either support or question the work of leading theologians Wolfhart Pannenberg and Jürgen Moltmann on the theology of history exploring the way in which the author of Revelation uses the dimensions of space and time to make theological points about the relationship between God and history The book argues that Revelation sets the present earthly experience of the reader in the context of God s ultimate purposes by disclosing hidden dimensions of reality both spatial embracing heaven and earth and temporal extending into the ultimate future Dr Gilbertson offers a detailed assessment of the theologies of history developed by Pannenberg and Moltmann including their views on the nature of the historical process and the use of apocalyptic ideas in eschatology *Cultures of Unemployment* Godfried Engbersen, Kees Schuyt, Jaap Timmer, Frans van Waarden, 2006 An extraordinarily rich and detailed study of the social and economic life of unemployed and poor households Michael Sherraden in *Social Work* **Spirit in the Writings of John** Tricia Gates Brown, 2004-05-01 Tricia Gates Brown employs the methodology of socio scientific biblical criticism to investigate the pneumatology of John and 1 John She argues that the meaning of spirit in John and 1 John is best understood using the anthropological model of brokerage The model of patronage and its relevance to the socio cultural world of John s gospel is also discussed Spirit in the Writings of John examines the development in pneumatology between John and 1 John and analyzes what this suggests about the socio cultural context of the Johannine community There is a discussion of the meaning of the term paracletos in literature antedating John and the dominant view that the word was a formal forensic term is challenged Communication Research Measures II , 2009 Expanding and building on the measures included in the

original 1994 volume *Communication Research Measures II A Sourcebook* provides new measures in mass interpersonal instructional and group organizational communication areas and highlights work in newer subdisciplines in communication including intercultural family and health It also includes measures from outside the communication discipline that have been employed in communication research The measures profiled here are the best of the best from the early 1990s through today They are models for future scale development as well *The Social World of Jesus and the Gospels* Bruce J.

Malina,2002-11-01 In order to interpret historical writings the reader must not employ their modern understanding of the world but must strive to grasp the mindset of the original audience To assist the twentieth century New Testament reader in understanding the literal meaning of the New Testament is the goal of this collection of essays *The Social World of Jesus and the Gospels* provides the reader with a set of possible scenarios for reading the New Testament How did first century persons think about themselves and others Did they think Jesus was a charismatic leader Why did they call God father Were they concerned with their gender roles The eight essays in this collection were previously published in books and journals generally not available to many readers Carefully selected and edited this collection will be both an introduction and an invaluable source of reference to Bruce Malina's thought **Understanding Policy Fiascoes** Paul 't Hart,2017-09-08 A

crisis of governance is widespread in western societies Public administration is caught in a web of personal and organizational inter dependencies that require continuous awareness and readjustment on the part of its practitioners *Understanding Policy Fiascoes* applies policy analysis to come to terms with policy fiascoes with a full appreciation of its limits Despite the fact that policy failures may seem universal they are in fact better understood as social political and academic constructions Bovens and tHart trace how and why certain episodes of public policymaking become labeled as fiascoes They highlight the analytical and political biases that shape our judgments of policy outcomes and the performance of policymakers and institutions When put in their proper historical institutional and policymaking perspective many policy fiascoes could easily have turned out quite differently The authors show that the fact that these policy episodes unfolded as they did does not mean that they were inevitable Careful analysis indicates that a whole series of variables if not always manageable can through careful configurations of decisions alter the course and outcomes of policies and programs as well as the post hoc judgments made about them In examining public policymaking certain questions arise If public policymaking has failed so miserably what does this tell us about the state of policy analysis While policymakers are facing a crisis of legitimacy policy analysis have been forced to reconsider the validity of their knowledge claims and the extent of their impact on the practice of policymaking *Understanding Policy Fiascoes* will provide social scientists policymakers and political scientists with compelling perspectives on old problems and a path breaking way to handle new problems *A Geography Of Time* Robert N. Levine,2008-08-01 In this engaging and spirited book eminent social psychologist Robert Levine asks us to explore a dimension of our experience that we take for granted our perception of time When we travel to a different country

or even a different city in the United States we assume that a certain amount of cultural adjustment will be required whether it's getting used to new food or negotiating a foreign language adapting to a different standard of living or another currency. In fact, what contributes most to our sense of disorientation is having to adapt to another culture's sense of time. Levine, who has devoted his career to studying time and the pace of life, takes us on an enchanting tour of time through the ages and around the world. As he recounts his unique experiences with humor and deep insight, we travel with him to Brazil where to be three hours late is perfectly acceptable and to Japan where he finds a sense of the long term that is unheard of in the West. We visit communities in the United States and find that population size affects the pace of life and even the pace of walking. We travel back in time to ancient Greece to examine early clocks and sundials, then move forward through the centuries to the beginnings of clock time during the Industrial Revolution. We learn that there are places in the world today where people still live according to nature time, the rhythm of the sun and the seasons, and event time, the structuring of time around happenings. When you want to make a late appointment in Burundi, you say, "I'll see you when the cows come in." Levine raises some fascinating questions: How do we use our time? Are we being ruled by the clock? What is this doing to our cities? To our relationships? To our own bodies and psyches? Are there decisions we have made without conscious choice? Alternative tempos we might prefer. Perhaps, Levine argues, our goal should be to try to live in a multitemporal society, one in which we learn to move back and forth among nature time, event time, and clock time. In other words, each of us must chart our own geography of time. If we can do that, we will have achieved temporal prosperity.

Campfires of Freedom Keith P. Wilson, 2002 Three related themes are examined in this fascinating study: the social dynamics of race relations in Union Army camps, the relationship that evolved between Southern and Northern black soldiers, and the role of off-duty activities played in helping the soldiers meet the demands of military service and the challenges of freedom. By vividly portraying the soldiers' camp life and by carefully analyzing their collective memory, the author sets the camp experience in the broader context of social and political change.

The Future and Its Enemies Daniel Innerarity, 2012-07-25 Humans may be the only creatures conscious of having a future, but all too often we would rather not think about it. Likewise, our societies, unable to deal with radical uncertainty, do not make policies with a view to the long term. Instead, we suffer from a sense of powerlessness, collective irrationality, and perennial political discontent. In *The Future and Its Enemies*, Spanish philosopher Daniel Innerarity makes a plea for a new social contract that would commit us to moral and political responsibility with respect to future generations. He urges us to become advocates for the future in the face of enemies who are oblivious to the costs of modernization, press for endless and unproductive acceleration. His accessible book proposes a new way of confronting the unknown, one grounded in the calculation of risk. Declaring the classical right-left divide to be redundant, Innerarity presents his hopes for a renewed democracy and a politics that would find convincing ways to mediate between the priorities of the present, the heritage of the past, and the challenges that lie ahead.

Migration, Crisis and Temporality at the Zimbabwe-South Africa Border

Kudakwashe Vanyoro, 2024-02-29 This insightful book explores the governance of immobilities and temporality in African migration. It shares lessons from the experiences of Zimbabwean migrants fleeing economic crisis to the South African town of Musina and asks what the work of state and non-state actors there tell us about the management of immobile people and places.
