Ten Years That Changed The Face Of Mental Illness:

Ten Years that Changed the Face of Mental Illness Jean Thuillier, 1999 The Creation of Psychopharmacology David Healy, 2009-07 David Healy follows his widely praised study *The Antidepressant Era* with an even more ambitious and dramatic story the discovery and development of antipsychotic medication Healy argues that the discovery of chlorpromazine more generally known as Thorazine is as significant in the history of medicine as the discovery of penicillin reminding readers of the worldwide prevalence of insanity within living memory But Healy tells not of the triumph of science but of a stream of fruitful accidents of technological discovery leading neuroscientific research of fierce professional competition and the backlash of the antipsychiatry movement of the 1960s A chemical treatment was developed for one purpose and as long as some theoretical rationale could be found doctors administered it to the insane patients in their care to see if it would help Sometimes it did dramatically Why these treatments worked Healy argues provocatively was and often still is a mystery Nonetheless such discoveries made and unmade academic reputations and inspired intense politicking for the Nobel Prize Once pharmaceutical companies recognized the commercial potential of antipsychotic medications financial as well as clinical pressures drove the development of ever more aggressively marketed medications With verve and immense learning Healy tells a story with surprising implications in a book that will become the leading scholarly work on its compelling subject *History of Psychiatry and Medical Psychology* Edwin R. Wallace, John Gach, 2010-04-13 Most of the prefatory issues are extensively elaborated upon in the Prolegomenon which also contains the complete references to the texts and authors discussed below Nevertheless the Preface would be grossly incomplete without touching on some of these issues books and scholars Too many of this book's chapters e.g. Mora's Marx's D.B. Weiner's examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in German French Italian and Spanish Also in his 1968 *Short History of Psychiatry* discussed below Ackerknecht pp xi xii references important nineteenth and earlier twentieth century psychiatric histories in English French and German Such citations will of course not be repeated here Finally thanks to several publishers re- editions of dozens of classical psychiatric texts one can consult their bibliographies as well See Prolegomenon for references to these splendid series In a rough and ready sense medical history began in classical Greece for example *On Ancient Medicine* While traditionally included in the Hippocratic corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor Moreover the Hippocratic and other schools were hardly as secular as we now suppose *On Epilepsy* for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease *Ten Years That Changed the Face of Mental Illness* Jean Thuillier, 1999-09-01 An absorbing account of the development of chlorpromazine written by a participant working with the original team *Health and Health Care 2010* Institute for the Future, 2010-08-20 *Health and Health Care 2010* Second Edition offers well researched coverage of health insurance managed care health care

providers the health workforce medical technologies information technologies consumerism public health services mental health child health health of the elderly chronic care and health behaviors and more Each of the volume s topics starts with historical background leading into the contemporary setting and is followed with predicted short term developments and forecasts reaching to the year 2010 Acknowledging the difficulty of long term predictions even by experts the projections are cast as stormy long and winding or sunny **The Changing Face of Health Care Social Work** Sophia F.
