achieve that we must develop a deep understanding of the Heian katas using Chinese philosophy The book explains how Yin and Yang and the Five Elements Wuxing theories are connected to the Heians We especially concentrate on the Wood Element which is the element of Heian Shodan and has profound implications on the kata Topics from Traditional Chinese Medicine TCM are brought up including the relations between the basic katas and the organs and meridians Then we turn to Emotional Karate and observe the psychological benefit that one could derive from Karate Karate can contribute to our mental well being And our state of mind as proven effects our body including chronic pains After understanding the distinguishing qualities of Heian Shodan we can understand why it is a particularly good kata for releasing a repressed anger As for other issues Some techniques are presented in order to improve the kata and our benefit from it We also learn how other katas may recuperate Heian Shodan A mathematical formula of the five Heians is suggested with an application to Heian Shodan s movements Other Shotokan katas are also mentioned as well as specific Karate moves and stances Finally we warn about excessiveness and explain how to prevent it By the way several interesting topics are discussed the far and the relatively modern history of Karate and of other martial arts our Karate ancestors and even Chinese and Japanese characters and words In conclusion although the book deals with Chinese philosophy it has many very applicable sides
