Abraham Lincoln and the Forge of National Memory Barry Schwartz, 2000 Abraham Lincoln has long dominated the pantheon of American presidents From his lavish memorial in Washington and immortalization on Mount Rushmore one might assume he was a national hero rather than a controversial president who came close to losing his 1864 bid for reelection In *Abraham Lincoln and the Forge of National Memory* Barry Schwartz aims at these contradictions in his study of Lincoln's reputation from the president's death through the industrial revolution to his apotheosis during the Progressive Era and First World War Schwartz draws on a wide array of materials painting and sculpture popular magazines and school textbooks newspapers and oratory to examine the role that Lincoln's memory has played in American life He explains for example how dramatic funeral rites elevated Lincoln's reputation even while funeral eulogists questioned his presidential actions and how his reputation diminished and grew over the next four decades Schwartz links transformations of Lincoln's image to changes in the society Commemorating Lincoln helped Americans to think about their country's development from a rural republic to an industrial democracy and to articulate the way economic and political reform military power ethnic and race relations and nationalism enhanced their conception of themselves as one people Lincoln's memory assumed a double aspect of mirror and lamp acting at once as a reflection of the nation's concerns and an illumination of its ideals and Schwartz offers a fascinating view of these two functions as they were realized in the commemorative symbols of an ever widening circle of ethnic religious political and regional communities The first part of a study that will continue through the present *Abraham Lincoln and the Forge of National Memory* is the story of how America has shaped its past selectively and imaginatively around images rooted in a real person whose character and achievements helped shape his country's future

The Forge of Vision David Morgan, 2015-10-27 Religions teach their adherents how to see and feel at the same time learning to see is not a disembodied process but one hammered from the forge of human need social relations and material practice David Morgan argues that the history of religions may therefore be studied through the lens of their salient visual themes *The Forge of Vision* tells the history of Christianity from the sixteenth century through the present by selecting the visual themes of faith that have profoundly influenced its development After exploring how distinctive Catholic and Protestant visual cultures emerged in the early modern period Morgan examines a variety of Christian visual practices ranging from the imagination visions of nationhood the likeness of Jesus the material life of words and the role of modern art as a spiritual quest to the importance of images for education devotion worship and domestic life An insightful informed presentation of how Christianity has shaped

and continues to shape the modern world this work is a must read for scholars and students across fields of religious studies history and art history **The Cambridge History of Nationhood and Nationalism: Volume 2, Nationalism's Fields of Interaction** Cathie Carmichael,Matthew D'Auria,Aviel Roshwald,2023-11-09 This major new reference work with contributions from an international team of scholars provides a comprehensive account of ideas and practices of nationhood and nationalism from antiquity to the present It considers both continuities and discontinuities engaging critically and analytically with the scholarly literature in the field In volume II leading scholars in their fields explore the dynamics of nationhood and nationalism s interactions with a wide variety of cultural practices and social institutions in addition to the phenomenon s crucial political dimensions The relationships between imperialism and nationhood nationalism and between major world religions and ethno national identities are among the key themes explained and explored The wide range of case studies from around the world brings a truly global comparative perspective to a field whose study was long constrained by Eurocentric assumptions **The Politics of Nationhood** P. Lynch,1999-01-13 For over a century the Conservative Party has been identified as the patriotic party defending the nation state and British identity Thatcherism sought to rework the Conservative politics of nationhood in the light of changed circumstances but the Thatcher and Major Governments faced significant problems managing the Union European integration and a multicultural society Philip Lynch examines the key developments and statecraft problems in the conservative politics of nationhood during the Thatcher and Major period

The Chinese National Character: From Nationhood to Individuality Warren Sun,2016-09-16 This unique survey of the evolution of the modern Chinese national character incorporates a rich blend of history and theory as well as nation gender and film studies It begins with the dawn of the concept of nation in China at the end of the Imperial period and follows its development from early Republican China to the present People s Republic drawing on themes of national identity Orientalness racial evolution and purity cultural and gender roles regional animosities historical impediments and more The book also takes up the changing American perceptions of Chinese personality development and gender using materials from American popular culture *The Origins of Scottish Nationhood* Neil Davidson,2000-04-20 The traditional view of the Scottish nation holds that it first arose during the Wars of Independence from England in the thirteenth and fourteenth centuries Although Scotland was absorbed into Britain in 1707 with the Treaty of Union Scottish identity is supposed to have remained alive in the new state through separate institutions of religion the Church of Scotland education and the legal system Neil Davidson argues otherwise The Scottish nation did not exist before 1707 The Scottish national consciousness we know today was not preserved by institutions carried over from the pre Union period but arose after and as a result of the Union for only then were the material obstacles to nationhood most importantly the Highland Lowland divide overcome This Scottish nation was constructed simultaneously with and as part of the British nation and the eighteenth century Scottish bourgeoisie were at the forefront of constructing both The majority of Scots entered the Industrial Revolution with a dual

national consciousness but only one nationalism which was British The Scottish nationalism which arose in Scotland during the twentieth century is therefore not a revival of a pre Union nationalism after 300 years but an entirely new formation Davidson provides a revisionist history of the origins of Scottish and British national consciousness that sheds light on many of the contemporary debates about nationalism *Notions of Nationhood in Bengal* Swarupa Gupta,2009 This book reopens the debate on colonial nationalisms going beyond derivative borrowed political and modernist paradigms It introduces the conceptual category of samaj to demonstrate how indigenous socio cultural origins in Bengal interacted with late colonial discourses to produce the notion of a nation Samaj a historical society and an idea in practice was a site for reconfiguring antecedents and negotiating fragmentation Drawing on indigenous sources this study shows how caste class ethnicity region and community were refracted to conceptualise wider unities The mapping of cultural continuities through change facilitates a more nuanced investigation of the ontology of nationhood seeing it as related to but more than political nationalism It outlines a fresh paradigm for recalibrating postcolonial identities offering interpretive strategies to mediate fragmentation

National Identities and the Right to Self-Determination of Peoples Hilly Moodrick-Even Khen,2016-06-10 In National Identities and the Right to Self Determination of Peoples Hilly Moodrick Even Khen revisits the legal right to self determination of peoples and suggests an integrative model for securing the cohesion of the various nationalities within multinational states The model set on both legal and political science theories departs from civic nationalism but calls to strengthen it with more immediate and emotional means such as shared national symbols and multicultural education Moodrick Even Khen explores the political history of Canada Belgium and Spain and touches upon other divided societies such as South Africa Northern Ireland and Cyprus Drawing upon these cases she suggests a future model for a cohesive society in Israel which is currently nationally divided between Arabs and Jews **Myths and Nationhood** Geoffrey A.
